MOHANRAJ M

FULL STACK PYTHON DEVELOPER

+91-8940296171 | mohanrajmoha83@gmail.com | linkedin.com/in/mohanraj-m-765672292 | github.com/mohanrajmoha82-sketch

SUMMARY

Motivated Full Stack Python Developer with hands-on experience in HTML5, CSS3, JavaScript, Python, Django, Django REST Framework (DRF), RESTful API design, and MySQL. Skilled in building responsive web applications, implementing CRUD operations, authentication and role-based access control (RBAC), and debugging across the full software development life cycle (SDLC). Proficient with Git/GitHub version control and eager to contribute to an entry-level Python/Django Developer role while continuously strengthening my technical skills.

SKILLS

Frontend: HTML5, CSS3, Bootstrap (responsive/grid design), JavaScript

Backend: Django, Django REST Framework (DRF), REST API development, Django ORM, Django Admin, Django Forms

Programming Languages: Python, JavaScript

Database: MySQL (database design, basic query optimization)

Tools & Practices: Git, GitHub (version control), PyCharm, Visual Studio Code, Postman (API testing), Virtual Environment (venv), pip.

Core Competencies: Authentication & Authorization, Role-Based Access Control (RBAC), Problem-Solving & Debugging, Cross-Functional Collaboration

EDUCATION

B.Sc. Botany *Aug 2022 – May 2025*

Government Arts College (Autonomous), Salem Vincent, Kumarasampatti, Salem 636007

PROJECTS

Student Management System | Django REST Framework

GitHub: https://github.com/mohanrajmoha82-sketch/student_management_using_DRF

- Developed a Student Management REST API using Python, Django, and Django REST Framework (DRF) to manage student records end-to-end.
- Implemented full CRUD operations — student creation, listing, updating, retrieving, and deleting — through RESTful API endpoints.
- Built ModelSerializer classes to serialize and validate student data, integrating cleanly with Django models and the database.
- Used APIView, HTTP methods, Response, and standard HTTP status codes to design structured, client-friendly API responses.
- Implemented error handling and input validation, including 400 Bad Request and 404 Not Found responses for invalid or missing records.

Django Inventory & Order Management System | Django MVT

GitHub: https://github.com/mohanrajmoha82-sketch/Enterprise-Inventory-Management-Using-Django-MVT-

- Built an Order Management System in Python and Django using the MVT (Model-View-Template) architecture.
- Developed modules for product management, customer handling, and real-time inventory tracking.
- Implemented authentication, login/logout functionality, and role-based access control (RBAC) for admin and staff users.
- Integrated order calculation logic covering quantity, amount, GST, and final bill totals.
- Implemented CRUD operations for customers, products, and orders using Django models, forms, and views.
- Designed secure, login-protected URL routing with MySQL-backed data management and responsive HTML/CSS templates.

INTERNSHIP

AI Chatbot Application — LIVEWIRE *Internship*

GitHub: https://github.com/mohanrajmoha82-sketch/AI-Chatbot-

- Completed an internship building an AI Chatbot Application with API integration using Python.
- Developed a desktop-based AI chatbot using Python and Tkinter with a simple, user-friendly GUI.
- Integrated Ollama and Phi-3 Mini to generate AI-powered responses to user queries.
- Implemented real-time chat interaction, including user input, bot responses, scrolling, and Enter-key support.
- Added exception handling and message styling to clearly display user messages, bot responses, and errors.
