OBJECTIVE

To join an organization where I can utilize my knowledge and skills to contribute to its growth while also enhancing my professional development.

EXPERIENCE

Full Stack Developer, *Adroit Firm* 15/03/2025 – Present
Rajapalayam

- Designed and developed a full-stack invoice billing system with Admin and Executive role-based access.
- Built secure JWT authentication and protected routes for role-level authorization.
- Implemented Customer, Product, and Invoice management modules with full CRUD operations.
- Developed automated tax calculations (CGST/SGST) and dynamic invoice total generation.
- Created real-time sales dashboards showing daily, monthly, and yearly revenue.
- Built reporting module with date/customer filters and PDF export.
- Designed normalized PostgreSQL database schema and implemented using Sequelize ORM.

WordPress Developer, *Adroit Firm* 15/03/2025 – Present
Rajapalayam

- Developed and customized responsive websites using WordPress and Divi, translating client requirements into functional UI layouts.
- Integrated and configured plugins, optimized site performance, and ensured cross-browser and cross-device compatibility.
- Built and customized themes, modified CSS and JavaScript to extend Divi components beyond default capabilities.
- Implemented SEO best practices, security configurations, and backup workflows to improve site stability and visibility.

Percentage - 85

SSLC, *P.A.C.M. Higher Secondary School* 2018 – 2019
Percentage - 79

TECHNICAL SKILLS

Frontend
HTML, CSS, Javascript, React.js

Backend
Node.js, Express.js, Java

Database
MongoDB, PostgreSQL

Tools & Others
Wordpress, Divi, VS Code, Postman

AREAS OF INTEREST

- Problem Solving
- Web Development
- Mobile App Development

PROJECT

Dashboard for Building Construction Financial Expenses

- Developed a financial monitoring dashboard for construction projects.
- Features real-time expense tracking, data visualization, and cost optimization.
- Display total project budget vs. actual expenses in real-time.
- Technologies used: React.js, Node.js, MongoDB.

Scan QR to Order Food - Smart Restaurant Ordering System

- Developed a contactless food ordering web application using QR code scanning for table-wise ordering in restaurants and cafes.
- Features real-time menu display, order placement, admin-side order management, and automatic digital receipt generation.
- Enables users to scan a QR code, view the menu, place an order linked to their table, and receive a receipt after delivery confirmation.
- Technologies used: React.js, Node.js, MongoDB

Certification — Anjana Infotech

Web Development - (Anjana Infotech) 8/7/2024 – 8/1/2025
Completed a 6-month full-stack web development program focused on HTML, CSS, JavaScript, Node.js, Express.js, and MongoDB, building responsive frontends and RESTful backend APIs.

JavaScript Master Course – (Udemy)
Completed an in-depth JavaScript Master Course covering both fundamentals and advanced concepts.
