PROJECTS

The Sellora | *Multi-Vendor Accessories E-Commerce Platform*

- Built a full-stack multi-vendor e-commerce platform using Django REST Framework and React with JWT authentication and role-based access for Customer, Owner, and Admin roles.
- Implemented product management, shopping cart, fake payment gateway, and order tracking with PostgreSQL as the data store.
- Integrated Celery and Redis for background task processing, plus Gmail SMTP for automated cart-reminder and transactional emails.
- Designed a fully responsive, custom-built UI from scratch.

Musify | *Spotify-Inspired Music Streaming Platform*

- Developed a full-stack music streaming app using Django, React, JWT, and PostgreSQL with role-based access for Users, Artists, and Admins.
- Built a music player with play/pause, next/previous, shuffle, repeat, and real-time progress tracking.
- Implemented playlists, liked songs, and a personal library; enabled artists to manage tracks and admins to moderate content and users.
- Designed a responsive, Spotify-style UI with secure JWT-based authentication.

CareCloud | *Hospital Management System*

- Built a full-stack hospital management platform using React, Django REST Framework, PostgreSQL, and JWT authentication.
- Created role-based dashboards for doctors, staff, and pharmacy teams with real-time appointment and consultation tracking.
- Automated staff/patient ID generation with email notifications, weekly doctor availability scheduling, and a pipeline routing completed consultations directly to pharmacy orders.

Dressora | *E-Commerce Clothing Website*

- Built a responsive online clothing store using React.js, HTML, and CSS with Firebase for data storage.
- Implemented product listings, category-based navigation, and interactive UI elements to enhance user engagement.

INTERNSHIP

Android Developer Intern — India Edu Programs (via EduSkills)

- Completed a 3-month online internship focused on Android application development.
