Professional Summary

Enthusiastic Information Technology student with knowledge of Java, Python, SQL, HTML, CSS, and JavaScript. Interested in web development, database management, and software application development. Possesses strong problem-solving, communication, and adaptability skills developed through academic and project experience. Quick learner with a positive attitude toward exploring new technologies and collaborative environments. Seeking an opportunity to apply technical knowledge and contribute effectively to innovative software projects.

Skills

Programming	C, Java, Python
Database	SQL
Web Technologies	HTML, CSS, JavaScript
Soft Skills	Communication, Time Management, Adaptability

Education

B.Tech – Information Technology **2023–2027**
Sri Shanmugha College of Engineering and Technology
CGPA: 8.0

Higher Secondary Certificate (HSC) **2021–2023**
Government Girls Higher Secondary School, Tiruchengode

Projects

Construction ERP – Integrated Inventory & Finance Management System
Developed a ERP application using React, FastAPI, MySQL, and SQLAlchemy for managing construction materials, suppliers, purchases, and inventory. Implemented REST APIs and automated stock synchronization to maintain accurate inventory data and improve operational efficiency.

TinDog – Responsive Front-End Web Application
Developed a responsive front-end website using HTML, CSS, Bootstrap, and JavaScript with mobile-friendly layouts and modern UI sections. The project focuses on front-end design and responsiveness, including navigation, pricing cards, and testimonial components for a better user experience.

Hackathon

Smart India Hackathon (SIH) 2025 – Automated Attendance System for Rural Schools
Participated in Smart India Hackathon 2025 in the project proposal round with an Automated Attendance System for Rural Schools, focused on RFID/face-recognition-based attendance and offline data storage and automatic synchronization for rural areas.

MadeInIndia Hackathon 2026 – Thunai
Participated in **Made In India Hackathon 2026** under the **AI for Social Good** track with the project **Thunai**, a voice-first AI companion for elderly Tamil speakers. The project focused on Tamil voice interaction, medicine reminders, and emergency SOS assistance, and was presented through a **PowerPoint-based concept submission** during the hackathon evaluation round.

Certifications

- NPTEL – Software Project Management
- NPTEL – Java Programming
- Typewriting Certification – English & Tamil
