DHARSHINI VASU

Software Developer

+91 9025303547 | dharshinivasu917@gmail.com | GitHub | LinkedIn | LeetCode

Summary

Final-year Information Technology student with strong foundations in Java, C, Python, JavaScript, TypeScript, React.js, and SQL. Experienced in developing web-based applications and solving programming problems with a strong interest in software development and building efficient, user-focused solutions.

Education

B.Tech in Information Technology 2023–2027
Sri Shanmugha College of Engineering and Technology **CGPA: 8.5**

Higher Secondary Education 2019–2023
Kongu Kalvi Nilayam Matric Higher Secondary School **84%**

Technical Skills

Programming Languages: Java, C, Python, JavaScript, TypeScript
Web Technologies: HTML, CSS, React.js
Database: MySQL
Tools & Platforms: GitHub, Visual Studio Code, Ollama
Soft Skills: Communication, Team Collaboration, Time Management, Problem Solving

Achievements

1. Solved **340+ problems** on LeetCode.
2. Achieved **3-Star** rating in Java on HackerRank.
3. Achieved **4-Star** rating in C on HackerRank.
4. Recorded **937 GitHub contributions** in the last year.

Internship Experience

Digital Marketing Intern – InternMe June 2024–September 2024

- Assisted in planning and executing digital marketing campaigns.
- Managed social media content and supported audience engagement.
- Created digital content and contributed to campaign strategies.

Projects

QueryGenie – Natural Language to SQL Assistant **Java, Spring Boot, React.js, Ollama**
Developed an AI-powered application that converts natural language questions into SQL queries, enabling users to interact with databases without manually writing SQL. Implemented a local language model-based query generation workflow with SQL validation to restrict unsafe queries and improve reliable execution. Integrated database connectivity for executing generated queries and retrieving structured results.

CrackIt – AI Interview Preparation Platform **React.js, Flask, Python, Claude API**
Developed an interactive AI-based interview preparation platform for conducting role-based mock interviews and providing personalized feedback. Built a React frontend with a Flask backend and integrated Claude API for question generation, answer evaluation, and AI-driven feedback. Implemented REST API endpoints for interview sessions, answer submission, follow-up questions, and session management.

React Task – Component-Based Web Application **React.js, JavaScript, HTML, CSS**
Developed a component-based React application using reusable UI components to create structured and responsive user interfaces. Organized the application into reusable components and styling modules, demonstrating component-based architecture and maintainable frontend development.

Hackathon

Smart India Hackathon – Automated Attendance System
Developed a digital attendance solution aimed at reducing manual attendance errors in rural schools. Designed a structured approach for recording, tracking, and managing student attendance digitally, with a focus on improving attendance monitoring, record accessibility, and administrative efficiency.

Certifications

NPTEL – Programming in Java | NPTEL – Software Project Management
AICTE – Employability Skills | Udemy – Excel Data Insights
