# MADHUSANTHINI

Salem, Tamil Nadu | +91 86376 98989 | madhusanthinirajan.a@gmail.com | linkedin.com/in/madhusanthini-nagarajan

## CAREER SUMMARY

Final-year B.E. Computer Science and Technology student (2023–2027, CGPA 7.3) with proven ability to complete assigned tasks accurately and on time, backed by two internships spanning Python development and data analytics. Experienced in preparing documentation, reports, and dashboards to quality standards, cross-checking outputs for accuracy, and resolving issues independently or escalating appropriately.

## RELEVANT SKILLS

- Data Analysis & Reporting: Power BI dashboards, MS Excel (formulas, pivot tables), Pandas, MySQL/PL-SQL
- Tools: MS Excel, PowerPoint, Word, Python, OpenCV, basic Java
- Core strengths: attention to detail, structured documentation, cross-team coordination, meeting deadlines under time pressure

## EDUCATION

**B.E. Computer Science and Technology** *May 2027 (Expected)*
Vivekananda College of Engineering for Women, Tiruchengode, Namakkal | CGPA: 7.3

## INTERNSHIP EXPERIENCE

**Data Analytics Intern** | Femto Soft Technologies, Chennai *May – Jun 2026*

- Completed assigned data-cleaning, querying, and reporting tasks on schedule using Python (Pandas) and MySQL, following defined procedures to ensure accuracy
- Prepared interactive Power BI dashboards and reports for non-technical stakeholders, ensuring outputs met quality and clarity standards
- Cross-checked automated outputs against manual Excel calculations, resolving discrepancies independently within own area of work

**Python Developer Intern** | Elevate Labs (Remote) *Nov – Dec 2025*

- Built a Python-based NLP chatbot to automate user query handling, delivering the assigned task within project timelines
- Performed systematic testing and debugging, promptly addressing defects to maintain release quality

## KEY PROJECTS

**Smart LT Line Fault Detection System (Patent-Documented)**

- Designed an ESP32/Arduino-based fault detection system with GSM/GPS modules for real-time monitoring and alerting
- Authored full patent documentation across a 9-part specification structure with verified prior-art citations

**Real-Time Sign Language Translator**

- Built using Python, OpenCV and ML to translate sign language gestures into text in real time

## ACHIEVEMENTS

- Top 10 Finalist — Tamil Nadu Global Startup Idea Pitching Competition
- Participant — Women Who Master Hackathon 2026 (Zonal Round, Chennai)

## CERTIFICATIONS & COURSEWORK

- Google Data Analytics Certificate — Foundations: Data, Data, Everywhere (Google)
- MongoDB & AI Skill Badges: AI Agents, Vector Search, RAG, MongoDB Basics | Core Coursework: DBMS, Computer Networks, Information Security fundamentals
