SUMMARY

Full-Stack Software Developer specializing in Java, TypeScript, Node.js, and React, with hands-on experience building scalable web applications and production REST APIs for real-world clinical workflows. Proven track record of delivering high-performance systems (95% detection accuracy, 200+ item data catalogs) through clean, maintainable code and efficient system design. Certified AWS AI Practitioner (in training) with growing expertise in cloud-based AI integration (Google Gemini API).

WORK EXPERIENCE

SRIVYN Platforms Private Limited | Junior Full-stack Developer — Erode | April 2026 - Aug 2026

- Contributed to a microservices-based Hospital Management System (14+ services including Patient, OPD, Billing, and Telemedicine) behind an API Gateway, supporting Patient Booking and Doctor Consultation workflows across 23 clinical specialties.
- Built responsive frontend modules using Next.js and Tailwind CSS, and implemented secure JWT-based authentication with NestJS and Passport.js.

Six Phrase Edutech Pvt Ltd | Web Development Intern — Coimbatore | August 2025

- Implemented secure user authentication (JWT/OAuth) and built interactive frontend dashboards with progress visualization features, enhancing user engagement.
- Translated high-fidelity Figma/UI prototypes into responsive React components, accelerating developer handoff and ensuring 100% design consistency.

PROJECTS

AUTOMATED DETECTION OF NON-HELMETED MOTORCYCLISTS

Tech Used: Java, PHP, React, TypeScript, Maven, GCP, MySQL

- Engineered an automated traffic violation detection pipeline integrating YOLOv8 for helmet detection and PaddleOCR for vehicle license plate recognition with 95% accuracy.
- Designed a central dashboard in React backed by Java/MySQL REST services to process and log violation records in real time.

GFIT — AI FITNESS PLATFORM

Tech Used: Next.js, React, TypeScript, Tailwind CSS, Node.js, Express, PostgreSQL, Google Gemini API

- Created a full-stack health platform featuring a structured catalog of 200+ exercises, dynamic filtering, and custom workout creation.
- Integrated Google Gemini AI to deliver personalized workout plans, meal recommendations, and progress analytics via low-latency JSON responses.

SMART IRRIGATION SYSTEM

Tech Used: Python, IoT Sensors, Arduino, Soil Moisture Sensor, Embedded C

- Minimized water wastage by 30% and boosted overall irrigation efficiency by 90% compared to traditional manual watering.
- Programmed an automated telemetry-driven irrigation controller utilizing soil moisture sensors to trigger threshold-based water distribution.

EDUCATION

B.Tech, Information Technology – Nandha College of Technology — 2022 – 2026
CGPA: 7.82

HSC – Arignar Anna Govt. Higher Secondary School — 2021 – 2022

SSLC – Arignar Anna Govt. Higher Secondary School — 2019 – 2020

SKILLS

Languages: Java, TypeScript, JavaScript, SQL
Frameworks: React, Next.js, Node.js, Express.js
Web Development & Databases: HTML5, CSS3, PostgreSQL, RESTful APIs, Microservices Architecture
Developer Tools: Git, GitHub, Postman
Testing: Playwright, Page Object Model (POM)

CERTIFICATION

Java DSA Course – Master the Fundamentals and Beyond — Sep 5, 2025
Programming in Java (Elite Silver – NPTEL) — Jan - Apr 2025
Mastering AI on AWS: Training AWS Certified AI-Practitioner (Udemy) — Jan 20, 2025
