PROFESSIONAL SUMMARY

Results-driven professional with 7+ years of experience delivering scalable digital products across the IT industry. Skilled in end-to-end product lifecycle management, business analysis, and cross-functional collaboration. Adept at gathering and translating complex business requirements into clear BRDs, FRDs, PRDs, wireframes, user flows, and user stories, ensuring seamless development and high-quality delivery.

Experienced in driving product strategy, backlog prioritization, and sprint planning using Agile/Scrum methodologies. Proficient in conducting requirement elicitation, gap analysis, root cause analysis, workflow modelling (UML), process optimization, stakeholder management, and usability improvements. Hands-on expertise with industry-standard tools including JIRA, Confluence, Figma, Miro, MS Visio, Excel, Power BI, and SQL for basic data analysis. Strong background in coordinating with engineering, QA, design, and business teams to release features that enhance user experience, operational efficiency, and business KPIs. Recognized for strong ownership, structured problem-solving, documentation excellence, and the ability to align technical teams with business goals.

CORE COMPETENCIES

Business Analysis | Requirements Gathering | Stakeholder Management | Data Analysis | Business Process Optimization | Product Management | Project Coordination | Quality Assurance | Manual Testing | Agile Methodologies | SDLC | User Acceptance Testing | Gap Analysis | Process Mapping | Dashboard Development | Cross-functional Collaboration

TECHNICAL SKILLS

Data Analytics: Power BI, Tableau, Advanced Excel, **AI Tools:** ChatGPT, Claude, Gemini, Perplexity, Julius MySQL, Python

Project Management: JIRA, Confluence, Agile, Scrum **Testing Tools:** BrowserStack, JIRA

Documentation: BRD, FRD, Use Cases, Process Flow Diagrams

PROFESSIONAL EXPERIENCE

Sarbajira Software Pvt Ltd, Chennai, Tamil Nadu | Jan 2026 - Present

Project Manager

(Working for TVS Supply Chain Solutions)

- Managed and maintained comprehensive product documentation including requirements specifications, process guides, and release notes to ensure clarity across development and business teams
- Conducted quality assurance reviews on product deliverables, verifying that outputs aligned with defined requirements and met expected standards prior to release
- Coordinated and facilitated product demos for stakeholders, presenting features, workflows, and functionality to gather feedback and drive informed decision-making
- Created detailed flowcharts and process diagrams to visually represent product workflows, system interactions, and business processes for cross-functional team alignment
- Managed follow-ups with development, design, and business teams to track action items, resolve pending queries, and ensure timely progress on product tasks
- Served as the primary point of contact for clarifying product-related doubts raised by internal teams, ensuring consistent understanding of requirements and product behaviour

• Gathered, analysed, and suggested product requirements by working closely with stakeholders, translating business needs into structured inputs to guide product development decisions

Blink Research and Service Private Limited, Chennai, Tamil Nadu | April 2019 - December 2025

Associate Product Manager

• Played a key role in Product Lifecycle Management (PLM) by defining product strategy, prioritizing the product backlog, and contributing to roadmap planning

• Conducted User Research, Competitor Analysis, and Market Requirement Analysis to guide product feature decisions

• Authored detailed User Stories, Feature Specifications, Release Notes, and collaborated with design teams for wireframes and UX improvements

• Managed release planning, sprint prioritization, and cross-functional communication to support timely and high-quality product delivery

• Analyzed product usage metrics, funnel performance, and user behavior insights to drive continuous product optimization

• Coordinated go-to-market (GTM) activities, ensuring smooth product launch in collaboration with sales, marketing, and support teams

Business Analyst

• Conducted end-to-end Requirement Engineering activities, including elicitation, analysis, documentation, and validation following SDLC and Agile frameworks

• Developed structured BRDs, FRDs, User Stories, Use Cases, and Acceptance Criteria, ensuring clear traceability with project scope using JIRA and Confluence

• Performed detailed Gap Analysis, Process Mapping, Workflow Design, and Impact Assessment to support system enhancements and process improvements

• Collaborated with cross-functional stakeholders (development, QA, product, and business teams) to ensure alignment of requirements with technical feasibility

• Designed and published interactive Power BI and Tableau dashboards to support data-driven decision-making across leadership and operational teams

• Utilized AI-driven documentation and analysis tools to streamline reporting, requirement drafting, and productivity automation

• Conducted user training, demos, and knowledge transfer sessions during rollout, ensuring smooth change management and end-user adoption

Manual Tester

• Designed and executed Test Plans, Test Scenarios, and Test Cases aligned with functional and non-functional requirements

• Performed multiple testing types including Smoke, Sanity, Functional, Regression, Integration, System Testing, and UAT

• Utilized BrowserStack for cross-browser and cross-platform compatibility testing, reducing production defects

• Logged and tracked defects using JIRA, collaborating closely with developers to ensure timely bug resolution

• Conducted Exploratory Testing and Ad-hoc Testing to uncover edge cases and improve overall test coverage
