Professional Summary

MCA graduate with hands-on experience in Python-based application development, machine learning, backend APIs, databases, and web technologies. Skilled in Python, HTML, CSS, MongoDB, Git, and GitHub, with experience developing and integrating software solutions using FastAPI and REST APIs. Experienced in building data-driven applications, implementing problem-solving approaches, collaborating on projects, and learning new technologies quickly. Familiar with AWS cloud deployment and software development workflows, with a strong interest in building scalable and reliable applications.

Technical Skills

Programming: Python.
Frontend: HTML, CSS, React.js.
Backend: Python, FastAPI, REST APIs.
Database: MongoDB, Firebase, SQLite.
Software Development: API Integration, Application Development, Data Processing, Problem Solving.
Machine Learning: Scikit-learn, Pandas, NumPy, Classification, Regression, Random Forest, XGBoost, Logistic Regression, Ensemble Learning.
Cloud & Deployment: AWS, REST API Deployment.
Version Control Tools: Git, GitHub, Postman, VS Code.

Education

PSG College of Technology, Coimbatore, Tamil Nadu *Aug 2024 – Jun 2026*
Master of Computer Applications (MCA)

Shri Sakthi Kailaash Women's College, Salem, Tamil Nadu *Aug 2019 – May 2022*
B.Sc. Mathematics

Internships

AI/ML Intern, *Doodle Blue Innovations Private Limited* *July 2026 – present*

- Develop and evaluate Python-based solutions for real-world business applications.
- Perform data preprocessing, feature engineering, model training, testing, and performance evaluation using Python and Scikit-learn.
- Work collaboratively with team members to analyze requirements, solve technical problems, and improve application solutions.
- Contribute to data-processing workflows and application development while adapting to new tools and technologies.

GenAI Data Analytics Virtual Experience Program, *Accenture (Forage)* *June 2024 – October 2024*

- Processed enterprise datasets using Generative AI tools and Large Language Models (LLMs) and reported actionable insights to stakeholders.
- Built automated data pipelines to streamline reporting workflows, reducing manual effort significantly.
- Collaborated with cross-functional teams to translate business requirements into analytical solutions.

Academic Projects

AI Caller – Finance Platform | Link *May 2026 – July 2026*

- Engineered an end-to-end AI application integrating Google Gemini LLM via API for real-time intent classification and automated conversational workflows.
- Integrated real-time sentiment analysis to detect customer emotions and dynamically adapt conversation tone.
- Implemented interactive voice automation to improve customer engagement and recovery outcomes.

MedPred AI – Clinical Decision Support System | GitHub *Jan 2026 – Mar 2026*

- Developed a Python-based clinical decision-support application using machine learning models.
- Implemented classification models including Random Forest, XGBoost, and Logistic Regression for multi-disease prediction.
- Developed a FastAPI backend for processing medical reports and delivering prediction results through APIs.
- Applied feature analysis and model evaluation techniques to improve prediction transparency and reliability.

WealthNest – Personal Finance Management App | GitHub *Mar 2025 – Jun 2025*

- Developed a cross-platform finance management app using Flutter and Firebase with real-time sync.
- Applied time-series forecasting techniques for expense prediction using ML regression models.
- Improved application performance using SQLite offline caching and lazy loading strategies.

Certifications

- Artificial Intelligence Fundamentals — IBM SkillsBuild
- Intro to Machine Learning — Kaggle
- Python for Data Science — IBM
- AWS Cloud Practitioner — Amazon Web Services
