PROFESSIONAL SUMMARY

Recent B. Tech graduate in Artificial Intelligence and Data Science with a strong foundation in Machine Learning, Deep Learning, Generative AI, and Agentic AI systems. Completed coursework and projects in NLP, Computer Vision, RAG, and multi-agent predictive maintenance. Eager to leverage analytical and innovative abilities to develop cutting-edge AI solutions and drive measurable business impact in a dynamic technology environment.

EDUCATION

B. Tech in Artificial Intelligence and Data Science - CGPA -7.47
Er. Perumal Manimekalai College of Engineering, Hosur
2022 – 2026

Higher Secondary (HSC) – 63%
Government Higher Secondary School, Anchetty
2020 – 2022

SKILLS

Python, SQL, Machine Learning, Deep Learning, NLP, AI Agents, LangChain, LLMs, Generative AI, Prompt Engineering, Computer Vision, TensorFlow, PyTorch, Power BI, Pandas, NumPy, Scikit-learn, Data Analytics, Matplotlib, FastAPI, Docker, MLflow, RAG, LangGraph, CrewAI, Anomaly Detection, Object Detection, Image Processing

PROJECTS

Airbnb Customer Review Summarization – Developed an NLP and Generative AI-based review summarization system to process large volumes of customer reviews and generate concise, meaningful summaries. Built an automated text processing pipeline using Python and LLMs to extract key insights from unstructured customer feedback.

Tesla Autopilot Clone - Object Detection – Developed a real-time object detection system for autonomous driving using Python, Deep Learning, and Computer Vision to detect and classify vehicles, pedestrians, and road objects. Implemented image/video preprocessing and inference pipelines using TensorFlow/PyTorch for automated visual perception.

Multi-Agent Predictive Maintenance System– Developed an intelligent predictive maintenance system combining Machine Learning, anomaly detection, and Agentic AI to identify potential equipment failures and generate maintenance recommendations. Designed multi-agent workflows using LangGraph/CrewAI with RAG, FastAPI, Docker, and MLflow for knowledge retrieval, deployment, and model tracking.

VIRTUAL INTERNSHIP EXPERIENCE

GenAI and Data Analytics – Virtual Internship | FORAGE Job Simulation

- Completed 5+ real-world data analysis and AI-driven problem-solving tasks across diverse business scenarios, delivering actionable insights for each case study.
- Cleaned and analyzed 5,000+ records using Python, Pandas, and Matplotlib, improving data quality and analysis efficiency.
- Applied TF-IDF and NLP text processing techniques to analyze 200+ financial documents, improving text classification accuracy by 25%.
- Built a rule-based AI chatbot handling 50+ financial query intents with 90% response accuracy.
- Strengthened data-driven decision-making through diverse real-world business scenarios.

CERTIFICATIONS

- **AI Agents** – GUVI
- **Cricket Analytics with Python** – GUVI
- **Master of AI&ML**– GUVI
