CAREER OBJECTIVE

To begin a career in VLSI Design and Embedded Systems where I can apply my knowledge of Digital Electronics, Verilog, Embedded C, and Microcontrollers to real-world projects. Seeking an opportunity to enhance my technical skills, contribute to innovative solutions, and grow as a skilled electronic professional.

TECHNICAL SKILLS

VLSI & Digital Design: Digital Electronics, Verilog HDL, RTL Design, Logic Design, Basic CMOS concepts
Embedded Systems: Embedded C, Microcontrollers, Sensor Interfacing, Actuator Control, Hardware-software Integration
IoT & Connectivity: ESP32, ESP8266, Blynk, Real-Time Monitoring.
Simulation & Development Tools: Arduino IDE, Wokwi, Tinkercad
Programming: C, Verilog HDL

EDUCATION

B.E – Electronics and Communication Engineering **2023 –2027**
KSR Institute for Engineering and Technology**,** Tiruchengode **|** CGPA**:** 7.8

Higher Secondary School (12th Grade) **2023**
Government Girls Higher Secondary School, Tiruchengode | Percentage: 74.8%

Secondary School (10th Grade) **2020**
Nalandas Matric and Higher Secondary School, Tiruchengode

PROJECTS

IoT-Based Smart Garbage Monitoring and Waste Segregation System

- Developed an IoT-based garbage monitoring system to detect bin level and waste condition using ultrasonic and moisture sensors, with real-time monitoring through Blynk.

IoT-Based Smart AC Control and Monitoring System

- Developed an IoT-based AC control system for remote monitoring and control using a microcontroller and IoT platform.

ESP32-CAM Based Microplastics Detection and Water Quality Monitoring

- Developed an ESP32-CAM based system to capture water sample images and identify possible microplastics particles using image processing, while water quality sensors monitor parameters such as turbidity, TDS, pH and temperature.

INTERNSHIPS AND TRAINING

IoT & Cloud Computing Internship – Samcore Technology, Tiruchirappalli

- Covered IoT concepts, cloud integration, device connectivity, and real-time data transmission principles.

Web Development Internship – Mayura Software Solutions, Erode

- Gained fundamentals of front-end development, built simple web application using HTML and CSS.

ACHIEVEMENTS & CERTIFICATIONS

- Volunteered at an IoT workshop, assisting participants with sensor integration and Blynk visualisation.
- Completed VLSI Design & Functions Verification Certification – RTL design and UVM testbench development.
