NANDHAK KISHORE D

nandhakkishore31@gmail.com — +91-8610585016 — github.com/Nandhakkishore — LinkedIn

PROFESSIONAL SUMMARY

B.Tech Information Technology student with hands-on experience developing full-stack, real-time, and security-focused applications. Experienced with React Native, Node.js, Express, PostgreSQL, Prisma, Socket.io, Java, Python, C, SQL, REST APIs, and Machine Learning fundamentals. Seeking an entry-level software development internship or trainee role to apply technical skills and gain industry experience.

EDUCATION

Sri Shanmugha College of Engineering and Technology Expected May 2027
B.Tech in Information Technology
CGPA: 7.5 (up to 5th Semester)

Government Boys Higher Secondary School, Komarapalayam 2023
Higher Secondary Education (HSC)
Percentage: 65.6%

TECHNICAL SKILLS

Programming Languages: Java (Core), C, Python
Web Technologies: HTML5, CSS3, JavaScript, React Native
Backend and Databases: Node.js, Express, PostgreSQL, Prisma, Socket.io, Supabase, SQL
Concepts: Object-Oriented Programming, Machine Learning Fundamentals, REST APIs
Tools and Platforms: Visual Studio Code, Git, GitHub, Docker, Docker Compose, Vercel

PROJECTS

CampusConnect – Real-Time Campus Collaboration Platform

- Built a full-stack mobile platform using React Native, Node.js, Express, PostgreSQL, Prisma, and Socket.io for students to find project partners, form hackathon teams, and pitch ideas.
- Developed a project and idea board with filtering by technology stack or branch, upvoting, and comments.
- Implemented a team formation workflow where accepting an applicant automatically creates a private team group chat.
- Built real-time 1:1 and group chat using Socket.io with persisted history, online presence, and typing indicators.
- Added a gigs board for short paid campus tasks and a live notification feed for applications and messages.
- Secured backend APIs with JWT authentication, added Jest/Supertest integration tests, and deployed using Docker Compose and Vercel.

Hybrid Phishing Detection Browser Extension

- Built a browser extension combining URL feature analysis and webpage-content analysis to detect phishing sites rather than relying only on URL patterns.
- Trained a machine learning classification model using the Kaggle PhiUSIIL Phishing URL Dataset containing 235,795 rows and 56 features for URL-based risk scoring.
- Developed an ML backend service to provide predictions to the extension and an admin dashboard for monitoring flagged sites.
- Used Supabase for hosted database management and application data storage.

Car Rental Application – Web-Based

- Built a web application for managing car availability and rental bookings using HTML, CSS, and JavaScript.
- Implemented dynamic user interface updates through DOM manipulation.

TRAINING AND CERTIFICATIONS

- **QSpiders – Java Training:** Core Java fundamentals and Object-Oriented Programming
- **NPTEL – Java Programming Certification**

SOFT SKILLS

- Communication
- Team Collaboration
- Time Management
