## PROFESSIONAL SUMMARY

Information Technology student (B.Tech, Graduating 2027) with a solid foundation in programming (C, Java, SQL) and full-stack web development (HTML5, CSS3, JavaScript, React.js, Node.js, Express.js). Hands-on project experience building responsive front-end applications, a full-stack Construction ERP system, and a role-based Task Management System, along with a Java Full Stack Development virtual internship. Strong analytical and problem-solving skills, a fast learner, and an effective communicator, seeking a Technology Program Internship to contribute to real engineering initiatives while deepening technical and software-development-lifecycle expertise.

## TECHNICAL SKILLS

**Languages:** C, Java, SQL, JavaScript

**Web Development:** HTML5, CSS3, JavaScript (DOM Manipulation, Event Handling, Client-Side Validation), React.js, Node.js, Express.js

**Database:** SQL, DBMS, MySQL, NeonDB (PostgreSQL)

**Tools & IDE:** VS Code, Git, GitHub, Canva, HackerRank

**Concepts:** REST API, JWT Authentication & Authorization, Role-Based Access Control (RBAC), CRUD Operations, Responsive Web Design, Form Validation, UI/UX Design, Full Stack Development

**Soft Skills:** Communication, Teamwork, Problem Solving, Time Management, Adaptability

## PROJECTS

**Task Management System (TSM)**
*Tech Stack: React.js, Node.js, Express.js, NeonDB (PostgreSQL), JavaScript, JWT, REST API*

A role-based full-stack task management system that allows Admins to manage employees and assign tasks, while Employees can view and update their assigned tasks.

- Implemented separate Admin and Employee login with role-based access control (RBAC).
- Developed task assignment, priority management, and task status tracking.
- Integrated REST APIs between the React.js frontend and Node.js/Express.js backend.
- Implemented JWT-based authentication and authorization.
- Added search, pagination, form validation, email notifications, and responsive UI.

**Construction ERP – Integrated Inventory to Finance Management System**
*Tech Stack: React.js, FastAPI, SQLAlchemy ORM, MySQL, REST API, JWT Authentication*

Built a full-stack ERP web application to manage the end-to-end construction material lifecycle, from procurement and inventory to payments and finance reporting.

- Designed a layered architecture with a React.js frontend, a FastAPI backend (REST APIs under /api/v1), and a SQLAlchemy ORM data access layer on MySQL.
- Implemented JWT-based authentication with role-based dashboards for Admin, Site Engineer, and Manager roles, backed by protected routes and an auth context.
- Built a purchase order workflow (create → approval → delivery), master data management for materials/suppliers, and Stock-In/Stock-Out modules updating inventory in real time.
- Built a payments module for full/partial payments against POs, feeding a Finance Dashboard with purchases, dues, payment status, and stock valuation.

## INTERNSHIP

**Google AI-ML & Java Full Stack Development Virtual Internships** – *EduSkills*

- Completed virtual internships covering AI/ML fundamentals and Java Full Stack Development (Java, HTML, CSS, JavaScript, databases) through structured assignments and practical assessments.

## EDUCATION

**B.Tech – Information Technology** **2023 – 2027**
Sri Shanmugha College of Engineering and Technology, Pullipalayam | CGPA: 7.5

**Higher Secondary Certificate (HSC)** **2022 – 2023**
SPB Matric Higher Secondary School, Pallipalayam, Namakkal | Percentage: 65%

## CERTIFICATIONS

- AICTE – Google AI-ML Virtual Internship
- AICTE – Java Full Stack Developer Virtual Internship

## ACHIEVEMENTS & ACTIVITIES

- Participated in technical workshops on web development and emerging technologies (workshop certificate available).

## LANGUAGES

Tamil, English
