Motivated professional with over 1 year of combined experience in data operations, team management, and technical freelance solutions. Proven ability to build scalable applications using Java, Python, and SQL while leading teams to achieve operational efficiency.

PROJECT

Salary Prediction Using Machine Learning

- Developed a salary prediction model using Python, Pandas, NumPy, scikit-learn.
- Performed data cleaning, scaling, and model evaluation (MAE, RMSE).
- Improved accuracy through feature selection and tuning.

Fake Social Media Profile Detection

- Created an ML concept to detect fake accounts using behavioural and pattern analysis.
- Implemented preprocessing and classification logic using Python and PostgreSQL for efficient data retrieval and storage.
- Helped reduce misclassification by refining activity-based rules.

Image Caption Generator (Deep Learning)

- Built an image captioning model using CNN for feature extraction and LSTM for captions.
- Used TensorFlow/Keras and trained on the Flickr dataset.
- Improved BLEU score by optimizing architecture and training parameters.
