PROFESSIONAL SUMMARY

Results-oriented Cyber Security Engineering graduate (2026) with practical experience in software development and security engineering. Proficient in Java, Python, Go (Gin framework), and JavaScript, with hands-on backend development using REST APIs, MySQL, and MongoDB. Strong foundation in web application security, ethical hacking, penetration testing, and OWASP Top 10 vulnerabilities. EC-Council certified across three domains. Actively seeking Software Developer, Backend Developer, Full Stack Intern, or Security Engineer roles.

TECHNICAL SKILLS

Languages: Java, Go/Golang, Python, JavaScript, C, C++

Web & Backend: HTML5, CSS3, REST APIs, JSON, Gin Framework, CRUD, RESTful Architecture

Databases: MySQL, MongoDB (Certified), GORM ORM

Dev Tools: Git, GitHub, Linux, VS Code, Postman

Cyber Security: Ethical Hacking, Penetration Testing, Vulnerability Assessment, OWASP Top 10, Network Security, Digital Forensics, OSINT, Burp Suite, Nmap, Kali Linux, Metasploit

Blockchain: Solidity, Smart Contracts, Decentralized Systems

WORK EXPERIENCE

Edu Tantr | Cybersecurity Intern *Jul 2024 – Sep 2024*

- Completed 3-month intensive training across 6+ security domains including web application security, OSINT, digital forensics, and privilege escalation.
- Identified and documented 10+ OWASP Top 10 vulnerabilities using Burp Suite across 3 simulated web application targets.

Pondicherry Cyber Crime Cell | Intern *Jan 2025*

- Gained exposure to 15+ real-world cybercrime investigation cases, understanding end-to-end case handling and evidence documentation.
- Assessed cybersecurity implications of embedded systems (Raspberry Pi, ESP32, Arduino) across 3+ IoT attack vectors.

PROJECTS

Secure Online E-Auction System using Blockchain *Jan 2026*

- Designed a decentralised auction platform using Blockchain to ensure transparency, data integrity, and non-repudiation; deployed Solidity smart contracts to automate bidding and prevent tampering.

Network Scanner & Reconnaissance Tool *Sep 2024*

- Executed comprehensive Nmap-based reconnaissance in Kali Linux (SYN, -sV, -sCV scans); mapped target services and identified security weaknesses to support penetration testing workflows.

Student CRUD REST API (Go + MySQL) *Jun 2025*

- Built a RESTful API in Go/Gin with full CRUD operations backed by MySQL via GORM; externalised credentials via environment variables for secure configuration.

EDUCATION

Mahendra Engineering College, Namakkal | B.E – Cyber Security Engineering *2022 – 2026*

CGPA: 7.25 | Expected Graduation: June 2026

Sri Saradha Balamabdir Boys Matric Hr. Sec. School | HSC – Maths & Computer Science *2020 – 2022*

CERTIFICATIONS & ACHIEVEMENTS

EC-Council – Network Defence Essentials (NDE), Ethical Hacking Essentials (EHE), Digital Forensics Essentials (DFE) • MongoDB – Introduction to MongoDB (Certified) • TCS National Qualifier Test (NQT) – Scored 59.61 (Aug 2025) • Cybersecurity 101 Certification

ADDITIONAL INFORMATION

Languages Spoken: English, Tamil **Interests:** Software Development, Ethical Hacking, Bug Bounty, Blockchain, Backend Engineering
