KAVINILA M

Software Engineer — Backend, APIs & Cross-Platform Development

Chennai, India | +91 8438034923 | kavinilam02@gmail.com | linkedin.com/in/kavinila-m-0a38a6320 | github.com/Kavinila290

PROFESSIONAL SUMMARY

Computer Science graduate (First Class with Distinction, CGPA 8.39/10.0) with hands-on internship experience building REST API endpoints (Node.js), applying object-oriented design to cross-platform mobile development (Flutter/Dart), and performing Python-based data analysis. Cisco-certified in Advanced C++, with a working foundation in systems-level programming and a track record of practical language and platform integration — from backend services to mobile UI. Currently completing a Java Full Stack Development program. Strong debugging and performance-optimization habits, evidenced by measurable improvements delivered in personal projects.

TECHNICAL SKILLS

Languages: C++ (Cisco Advanced Certified), Java, Python, JavaScript, SQL, PHP, R, Dart
Backend & APIs: REST API design & integration (Node.js), MySQL, MongoDB, schema design & query optimization
Cross-Platform & Frontend: Flutter, React.js, HTML, CSS
Tools & Cloud: Git, GitHub, VS Code, AWS (EC2, S3), SDLC exposure
Data & Analytics: Pandas, NumPy, EDA, Machine Learning, Power BI

WORK EXPERIENCE

Backend Intern — ASKAN Technologies, Pondicherry *Nov 2024 – Dec 2024*

- Designed and built REST API endpoints using Node.js to support backend logic and expose functionality to client applications — direct experience relevant to API design and integration.
- Supported database design and wrote SQL queries against MySQL and MongoDB, helping maintain data integrity across environments.

Flutter Developer Intern — Cherri Technology, Pondicherry *Aug 2023 – Sep 2023*

- Applied object-oriented programming (OOP) design patterns to build modular, reusable mobile application components — practical grounding in scalable software design.
- Developed Flutter UI components in a fast-paced, iterative environment, gaining early cross-platform UI integration experience.

Data Science Intern — TripleTechSoft, Chennai *Jan 2025 – Feb 2025*

- Performed data preprocessing and exploratory data analysis (EDA) on real-world datasets using Python.
- Built and evaluated machine learning models, applying structured problem-solving to translate data into actionable insights.

PROJECTS

Buildwise AI — AI-Powered Project Mentor | *React.js, Node.js, Claude AI API, GitHub API*

- Built an AI-powered mentorship platform generating tailored project ideas and step-by-step development roadmaps based on a developer's skill level and goals.
- Automated generation of technical documentation (README, project structure, contribution guidelines) and integrated a feedback engine to evaluate project descriptions — hands-on API integration and backend logic design.

Live: build-wise-ai-two.vercel.app

Climafy — Real-Time Weather Forecasting App | *Flutter, Dart, REST API*

- Built a cross-platform weather app retrieving live data for 200,000+ global locations via REST API integration.
- Reduced redundant network requests by ~40% through debouncing and caching strategies, improving app response time and performance.
- Implemented GPS-based location detection to auto-fetch hyperlocal forecasts, cutting manual city-entry steps by 100%.

EDUCATION

Java Full Stack Development Training — QSpiders, Chennai. *May 2026 – Present*

- Completed: SQL — database design, querying, joins, and optimization. In progress: Core & Advanced Java.

Bachelor of Computer Science — Theivanai Ammal College for Women, Chennai *2023 – 2026*
First Class with Distinction | CGPA: 8.39/10.0

HSC — Achariya Sikha Mandir (2022) | 78% • SSC — Sri Ramachandra Vidyalaya High School (2020) | 80%

CERTIFICATIONS

Cisco: C++ Advanced; Introduction to Cybersecurity; HTML Essentials; Data Science Essentials with Python
IBM: AI Fundamentals; Communication and Personality Dynamics; Problem Solving
Simplilearn: Flutter Development; Introduction to AI; Generative AI Studio
