YESWANTH N B

SOFTWARE | AI ENGINEER

Salem, Tamil Nadu, India • +91-6382334336 • n.b.yeswanth@gmail.com
GitHub: github.com/yeswanthNarayanan • **LinkedIn:** linkedin.com/in/yeswanth-n-b-862456264 • **Portfolio:** yeswanth-portfolio.vercel.app

PROFESSIONAL SUMMARY

Software & AI Engineer with 1 year of hands-on experience building scalable microservices, REST APIs, and intelligent data systems. Proficient in Python, TensorFlow, Transformers, LLM fine-tuning with QLoRA, RAG pipelines, vector databases (pgvector), and containerized deployments with Docker. Experienced in developing production-ready software applications for digital and data platforms.

TECHNICAL SKILLS

- **Programming Languages:** Python, SQL, TypeScript
- **AI & Machine Learning:** Generative AI, Large Language Models (LLMs), NLP, Computer Vision, RAG, Prompt Engineering, QLoRA
- **AI Frameworks & Libraries:** TensorFlow, Transformers, LangChain, LangGraph (Basic), CrewAI (Basic), Hugging Face, OpenCV, FastAPI, Gradio
- **Databases & Vector Stores:** pgvector, Supabase, ChromaDB, PostgreSQL, SQL Databases
- **Backend & Architecture:** RESTful APIs, API Integration, Microservices Architecture
- **DevOps & Infrastructure:** Docker, Kubernetes (Basic), CI/CD, Linux
- **Tools & Platforms:** Git, GitHub, Firebase, Ollama, Claude Code, Codex

PROFESSIONAL EXPERIENCE

Chisel Yourself — Software Engineer **Sep 2025 – Dec 2025 | Chennai, India**

- Built modular microservices and RESTful APIs to handle distributed data pipelines for core enterprise platforms.
- Integrated AI-driven inference modules into backend services, accelerating routine workflow processing and automated data tracking.
- Packaged cloud-native services using Docker containers and configured CI/CD deployment pipelines across staging environments.
- Debugged API endpoints, monitored execution logs, and optimized database queries to maintain low-latency system performance.
- Worked in an Agile sprint environment, collaborating directly with cross-functional dev teams on architecture and system integrations.

Chisel Yourself — Software Development Intern **Dec 2024 – Jun 2025 | Chennai, India**

- Developed API-based software modules and backend utility scripts for production web applications.
- Implemented third-party API integrations and automated manual data processing routines.
- Led a 4-member intern team across sprint deliverables, conducting code reviews and troubleshooting integration issues.
- Assisted engineering leads in build automation, deployment scripting, and performance benchmarking.

PROJECTS

Chisel Yourself Chatbot – RAG Recommendation System | *Next.js, RAG, pgvector, Supabase*

- Engineered a personalized RAG chatbot delivering tailored recommendations based on user lead data utilizing Next.js, pgvector vector queries, and Supabase backend.
- Integrated vector search queries with frontend UI components to deliver real-time recommendation outputs.

AI Friday – Multimodal AI Assistant | *Python, FastAPI, Transformers, TensorFlow, Gradio, LangChain, QLoRA*

- Built a multimodal AI assistant supporting document summarization, question answering, image understanding, and content generation using TensorFlow and FastAPI.
- Applied QLoRA parameter-efficient fine-tuning and prompt engineering to optimize open-source LLM components for document workflows.
- Designed an interactive web interface in Gradio featuring real-time streaming responses and multi-model routing.

AI-Powered CCTV Analyzer | *Python, Computer Vision, TensorFlow, Deep Learning*

- Developed an intelligent surveillance analytics system for real-time monitoring, event detection, and visual analytics generation.
- Processed frame-level video data using OpenCV and TensorFlow deep learning models to automate visual reporting.

AI Jarvis – Personal Voice Assistant | *Python, Speech Processing, Automation*

- Implemented a voice-guided assistant integrating speech recognition and OS-level automation scripts for desktop workflows.

RESEARCH PUBLICATIONS

- **AI-Powered CCTV Analyzer: Real-Time Surveillance Analysis with Automated Reporting and Visual Analytics** **Apr 2025**
- **An AI-Powered Interactive Assistant: Integrating Multimodal Interaction for Enhanced User Experience** **Dec 2024**

EDUCATION

Sona College of Technology — B.Tech in Artificial Intelligence & Data Science (CGPA: 7.83 / 10) **2021 – 2025**
SRK Matriculation Higher Secondary School — HSC (82%) **2020 – 2021**
SRK Matriculation Higher Secondary School — SSLC (78%) **2018 – 2019**

CERTIFICATIONS

- Python Essentials – Cisco & Google
- Introduction to Cybersecurity – Cisco
- Introduction to Hardware – Cisco

ACHIEVEMENTS

- IBM Hack Challenge 2024
- Smart India Hackathon 2023
- Built and published multiple open-source AI and software projects on GitHub.
