Objective

Computer Science and Business Systems graduate with hands-on experience in software development and AI/ML. Strong foundation in Java, Object-Oriented Programming, Data Structures and Algorithms, SQL/DBMS, REST APIs, and full-stack development. Interested in building reliable enterprise applications and solving real-world business problems through software and intelligent systems.

Education

B.Tech – Computer Science and Business Systems *2022 – 2026*
K.S. Rangasamy College of Technology CGPA: 8.7

Skills

Languages: Java, Python, JavaScript, SQL
Core: Data Structures and Algorithms, Object-Oriented Programming, DBMS/SQL
Backend: Spring Boot, Node.js, Express.js, REST APIs
Frontend: React.js, HTML, CSS, Tailwind CSS, Bootstrap
AI / ML: Machine Learning, Computer Vision, YOLO, OpenCV, Roboflow, PaddleOCR, LLM Integration
Databases / Tools: MySQL, MongoDB, Git, GitHub, WebSocket

Projects

AI-Powered Textile Spinning Mill ERP *Final Year Project*

- Designed an AI-powered ERP solution for textile spinning-mill operations, integrating production/demand prediction with scheduling support.
- Implemented a Random Forest model for production/demand prediction and explored Q-Learning for adaptive scheduling decisions.
- Built REST APIs using FastAPI and a React-based dashboard for monitoring predictions and scheduling outputs.

Business Finance Manager Lite GitHub

- Developed frontend pages for a business finance management application using React.
- Implemented backend functionality and REST APIs using Spring Boot for finance-related operations.
- Integrated the application with MySQL for persistent data management.

Coding and Quiz Assessment Platform GitHub

- Fully developed a full-stack assessment platform supporting coding and quiz examinations.
- Implemented real-time communication using WebSocket and developed role-based features for administrators and candidates.
- Built frontend and backend components and integrated the application with MongoDB.

Internship

AI & ML Intern, ES EthicSecure *Jun 2026 – Aug 2026*

- Worked on computer-vision solutions using YOLO, OpenCV, and Roboflow for image detection and analysis.
- Developed OCR pipelines using PaddleOCR for extracting information from images.
- Worked with Ollama and Groq for integrating LLM capabilities into AI/ML workflows.

Web Developer Intern, Statix.pro *Oct 2023 – Dec 2023*

- Developed an Employee Management System with improved UI and functionality.
- Collaborated using Git and GitHub for version control and team development.

Problem Solving

- Solved 100+ coding problems on LeetCode.
- Strong understanding of Data Structures, Algorithms, and problem-solving techniques.

Certifications

- NPTEL Elite + Silver Certification in Java Programming.
- Stanford Online – Supervised Machine Learning (Coursera).
