LeetCode | Codeforces | HackerRank | Portfolio

Objective

Enthusiastic and detail-oriented individual with a strong foundation in full-stack development, debugging, and problem-solving under pressure. Proven track record in competitive coding and debugging contests, with hands-on experience building AI- and computer-vision-based projects. Passionate about continuous learning, collaborating with dynamic teams, and contributing to real-world impact in a fast-paced tech environment.

Education

Sri Shanmugha College of Engineering and Technology
B.Tech in Information Technology | CGPA: 7.9 (through 6th semester)
NSVV Boys Higher Secondary School – HSC | 74%

Projects

ServeStock – Smart Restaurant Inventory, Waste & Operations Intelligence Platform GitHub

- Built a full-stack restaurant inventory platform to track ingredients, stock levels, purchase prices, minimum stock thresholds, and expiry risks.
- Developed REST APIs using Spring Boot and integrated them with React.js and React Native for inventory and operational monitoring.
- Connected inventory, expiry risk, waste, and financial cost to support data-driven purchasing decisions.
- *Stack:* React.js, React Native, JavaScript, Spring Boot, REST API, SQL, MySQL, HTML, CSS

WatchMan – AI-Powered Network Intrusion Detection System GitHub

- Built an AI-based network intrusion detection system to monitor live traffic and flag malicious activity in real time.
- Applied Random Forest and Isolation Forest models to detect anomalies with high accuracy.
- Designed an interactive dashboard to surface live security alerts and detailed activity reports.
- *Stack:* Python, Flask, Scapy, Scikit-learn, HTML, CSS, JavaScript

Touchless Mouse Interface GitHub

- Built a touchless virtual mouse that controls the cursor through real-time hand-gesture recognition.
- Detected 21 hand landmarks with MediaPipe Hands and processed video in real time using OpenCV.
- Mapped gestures to click, double-click, drag-and-drop, scroll, and screenshot actions.
- *Stack:* Python, OpenCV, MediaPipe, PyAutoGUI

Technical Skills

- **Languages:** C, C++, Java, Python, JavaScript
- **Frameworks & Libraries:** React.js, Spring Boot
- **Full Stack:** MERN (MongoDB, Express.js, React.js, Node.js), HTML, CSS, MySQL
- **Cloud:** AWS (Amazon Web Services)
- **Concepts:** OOP, Data Structures & Algorithms, Low-Level Design
- **Tools:** Git, GitHub, VS Code, IntelliJ IDEA, CLion, WordPress

Internship

Full Stack Intern – StartNet Venture Private Limited, Salem

- Developed and customized dynamic websites using WordPress.
- Assisted with front-end design, plugin integration, and website optimization.
- Collaborated with the team to improve performance and user experience.

Certifications

- **NPTEL** – Programming in Java; Problem Solving Through Programming in Python (2025)
- **Udemy** – Mastering HTML5 and CSS3, Part 2: Intermediate Level (2025)
- **Forage** – Deloitte Australia Technology Job Simulation (2025)

Awards

- **1st Prize – "Code Vertex"**, Government College of Engineering, Bargur (2025)
- **1st Prize – Debugging Competition**, Study World College of Engineering (2025)
- **1st Place – "Throne of Code"**, Government Mahila Engineering College Ajmer (2025)
- **2nd Prize – "Code Rescue"**, R. P. Sarathy Institute of Technology (2025)
