CAREER OBJECTIVE

Motivated B.Tech Information Technology student with a strong interest in software development and frontend technologies. Skilled in Java, Python, C, SQL, and web development fundamentals, with hands-on experience through academic projects and internship training. Familiar with Object-Oriented Programming, Data Structures and Algorithms (DSA), REST APIs, React fundamentals, version control using Git, core Software Development Lifecycle (SDLC) practices, and foundational cloud computing concepts. Passionate about building real-world applications, writing clean code, and continuously improving problem-solving skills.

EDUCATION

B.Tech - Information Technology (2023-2027) — CGPA: 8.2

Sri Shanmugha College of Engineering and Technology

Higher Secondary Education — Percentage: 84%

Government Higher Secondary School, Kallakurichi

TECHNICAL SKILLS

Programming Languages: Java, Python, C
Web Technologies: HTML, CSS, JavaScript, React (fundamentals)
Database: SQL, MySQL
Tools & Version Control: Git, GitHub, VS Code, MS Excel
Cloud Concepts: AWS, Azure, GCP (foundational/conceptual understanding)
Core Concepts: Object-Oriented Programming (OOP), Data Structures and Algorithms (DSA), REST API Basics, Debugging, Responsive Web Design, Software Development Lifecycle (SDLC)

PROJECTS

Smart Expense Tracker — Java, OOP, Collections, JDBC, MySQL

- Developed a Java-based expense management application using OOP principles and data structures to record, categorize, search, and analyze daily expenses.
- Implemented CRUD operations with MySQL and JDBC, using ArrayList and HashMap for efficient in-memory data handling.
- Built features for category-wise summaries, monthly expense calculation, and highest-expense detection.

Offline Voice Translator Application — Python

- Developed an offline voice translator that converts spoken language into text without internet connectivity.
- Integrated speech-to-text and text-to-speech modules with offline language translation for local processing.
- Designed a simple, user-friendly interface for seamless voice interaction.

INTERNSHIP EXPERIENCE

C Programming Intern — CodeAlpha — May 2026

- Accomplished automation of core arithmetic operations, as measured by elimination of manual calculation steps, by developing a calculator application using switch-case logic and structured control flow.
- Accomplished efficient matrix processing, as measured by support for addition, multiplication, and transpose across variable-sized inputs, by applying data structures and algorithmic logic using multi-dimensional arrays.
- Accomplished reliable, persistent data storage, as measured by successful save/retrieve operations across sessions, by building a student management system using structures and file handling following standard SDLC practices.
- Accomplished stronger command of core programming fundamentals, as measured by successful delivery of four functional modules, by applying loops, functions, arrays, structures, and file I/O with attention to code modularity and version control using Git.

CERTIFICATIONS & WORKSHOPS

- NPTEL - Programming in Java
- NPTEL - Fundamentals of Software Project Management
- Great Learning - Frontend Development - HTML
- Workshop - Deep Learning and Neural Networks - Karpagam College
- Technical PPT Presentation - Nanamani College
