MOHAMED MARZOOK ES

ASPIRING DATA ANALYST INTERN

+91 9597171812 | mohamedmarzook1718@gmail.com | **linkedin.com/in/mohamedmarzookes** | **github.com/mohamedmarzook1718**

SUMMARY

Computer Science undergraduate with hands-on experience building Python-based data pipelines, machine learning applications, and data visualization dashboards. Proficient in extracting actionable insights from complex datasets and communicating findings through clean, intuitive visuals. Eager to apply strong analytical foundations and technical skills to support data-driven business decisions as a Data Analyst Intern.

EDUCATION

Bachelor of Science (B.Sc.) in Computer Science — Sep 2023 – Jun 2026
VET Institute of Arts and Science — **CGPA: 7.8 / 10**

Higher Secondary Certificate (12th Grade) — 2022 – 2023
Crescent Matriculation Higher Secondary School — **58%**

Secondary School Certificate (10th Grade) — 2020 – 2021
Crescent Matriculation Higher Secondary School — **Passed**

SKILLS

Languages & Querying	:	Python (Pandas, NumPy, Matplotlib), SQL
Data Visualization	:	Streamlit, Matplotlib, MS Excel (Charts, Pivot Tables)
Databases	:	MongoDB (Basic)
Tools & Version Control	:	Git, GitHub
Fundamentals	:	Cloud Computing

INTERNSHIP

Python Development Intern — *7-Day Intensive Program*

- Analysed data inputs and automated workflows using core Python concepts, improving solution delivery through iterative testing and debugging.
- Collaborated with team members to identify real-world problems and translate them into structured, functional software solutions.
- Gained hands-on experience converting business problem statements into clean, well-tested software deliverables.

CERTIFICATIONS & ACHIEVEMENTS

- **Python Programming** — Infosys & MSME Certification Programs
- **Cyber Security** — Network defense & security best practices
- **Smart India Hackathon (SIH)** — Cleared two rounds; team-based problem solving
- **MongoDB** — Database design & NoSQL concepts (Basic)
- **Android App Development (Kotlin)** — Hands-on workshop

PROJECTS

Real vs AI Image Detector — *2025*

- Engineered a deep learning CNN pipeline trained on the CIFAKE dataset (60,000+ images) to classify real vs AI-generated images with measurable classification accuracy.
- Built a Streamlit web interface supporting image upload and URL-based prediction with per-class confidence scores for end-user clarity.

Technologies: Python, TensorFlow/Keras, NumPy, Pandas, Streamlit

Real-Time Object Detection Using YOLO — *2025*

- Developed an automated video analytics system using YOLO for real-time object detection and classification across live and recorded feeds.
- Validated detection accuracy across varied environmental conditions for surveillance and traffic monitoring use cases.

Technologies: Python, YOLO, OpenCV, Deep Learning

Water Supply Network Control System — *2023*

- Designed an IoT-based monitoring system that ingests real-time sensor data from water supply networks to track operational metrics and flag anomalies.
- Improved resource utilisation through data-driven analysis, enabling proactive maintenance and reducing operational inefficiencies.

Technologies: IoT, Python, Sensors
