PROFESSIONAL IDENTITY

AI and Data Science undergraduate skilled in C, C++, Python, and full-stack development (HTML, CSS, JavaScript). Experienced in building console and terminal-based applications with strong data structures and system design fundamentals, and modern AI-assisted workflows. Certified in cybersecurity, exposed to computer vision, eager to contribute to real-world engineering teams.

PROFESSIONAL EXPERIENCE

Full Stack Development Intern *Cognifyz Technologies (2026)*

- Designed, developed, and deployed structured, responsive, and interactive web pages using HTML, CSS, and JavaScript.
- Worked on page layouts, styling, navigation structures, and interactive elements to optimize overall UI/UX performance.
- Assisted in testing page layouts across different screen resolutions, performing cross-browser debugging, and resolving styling bugs.
- Conducted systematic functional testing, identified frontend errors, and implemented necessary code fixes to maintain stability.
- Collaboratedwiththedevelopmentteamtoensureconsistentdesignstandards,codequality,andsmoothdeploymentcycles.

FLAGSHIP PROJECTS

College Management Chaos *Role: Business Analyst*

- Gathered and analyzed requirements from a real college administrative workflow and translated them into functional system specifications.
- Designed a web-based system to manage student records, attendance, and core college administrative workflows.
- Built modular front-end and back-end components to handle CRUD operations, reducing manual paperwork and streamlining daily operations.

Mini Ludo Game (Terminal) *Python*

- Developed a console-based Mini Ludo Game with dice rolling, board state management, and winning-condition logic.
- Implemented input validation and live score tracking using clean, modular function structures.

Snake Game (Terminal) *Python*

- Built an interactive terminal-based Snake Game with real-time movement, dynamic direction controls, and precise collision detection.
- Implemented dynamic score tracking and automated game-over state resets for smooth continuous gameplay.

ACADEMIC JOURNEY

B.Tech - Artificial Intelligence and Data Science	CMS College of Engineering	**CGPA: 8.10**
2023-2027	Anna University	
HSC	Government Model Higher Secondary School	**80%**
2021-2023	Higher Secondary Education	
SSLC	Government Model Higher Secondary School	**80%**
2019-2021	Secondary Education	

ACHIEVEMENTS & CERTIFICATIONS

- **NPTEL Cloud Computing Certification:** Learned core concepts of cloud architecture, virtualization, and deployment models through a certified NPTEL course, gaining exposure to how modern cloud services are structured and managed.
- **Programming in C and C++:** Completed a certified course covering core programming logic, syntax, and problem-solving techniques, building a strong foundation in structured and procedural programming.
- **Cyber Security by Google:** Acquired foundational knowledge in cybersecurity principles, threat mitigation, and safe digital practices, understanding how systems and data are protected from common risks.
- **Computer Vision Workshop (IIT Madras):** Gained hands-on exposure to image processing and feature detection techniques, learning how visual data is analyzed and interpreted in real-world AI applications.
- **Programming in C++ with OOPs:** Mastered object-oriented concepts such as inheritance and polymorphism, strengthening the ability to design modular and reusable code structures.
- **Python Programming Workshop (IIT Madras):** Strengthened problem-solving and scripting fundamentals through hands-on Python exercises, improving overall coding fluency and logical thinking.

TECHNOLOGY STACK

- **Languages & Web:** Python, C++, C, JavaScript, HTML5, CSS3, and Full Stack Development, with the ability to build both frontend interfaces and backend logic.
- **Databases & Tools:** MySQL, Git, GitHub, VS Code, and RESTful API integration basics, enabling smooth version control and structured project workflows.
- **Core Concepts:** Data Structures and Algorithms (DSA), OOPs, Data Analysis, Machine Learning fundamentals, Data Visualization, Responsive Web Design, and MS Office Suite.
