Portfolio

PROFESSIONAL SUMMARY

Aspiring Web Developer skilled in Java, Spring Boot, HTML, CSS, JavaScript, and MySQL, seeking an entry-level role to apply technical skills in building impactful applications. Eager to contribute to real-world projects while continuing to expand expertise in modern web technologies and software development best practices.

EDUCATION

Nov 2022 – May 2026 | Government College of Engineering – Erode, Tamil Nadu
Bachelor of Computer Science and Engineering – **CGPA: 8.01**

Jun 2021 – May 2022 | Sengunthar Matric Higher Secondary School – Salem, Tamil Nadu
Class XII – **Percentage: 83.66%**

SKILLS SUMMARY

Programming Languages: Java, HTML, CSS, JavaScript, SQL, Python, C

Framework: Spring Boot

Databases MySQL, H2 Database

Tools: IntelliJ, Eclipse, VS Code, Sublime Text, Docker

Platform: EC2 Instance, XAMPP

Soft Skills: Led small project teams during academic projects, collaborated effectively in group development environments, communicated technical concepts clearly, managed multiple deadlines efficiently, adapted quickly to new frameworks and tools.

EXPERIENCE

Jun 2025 – Jul 2025 | Full Stack Development Intern – Incrix

- Completed a 1-month full stack internship at Incrix, collaborating with a team to deliver production-ready features.
- Developed a Book Store API project using Spring Boot and MySQL in That 1 Month.
- Deployed the application on AWS EC2 using Docker, reducing deployment time by 30% compared to manual setup.
- Optimized API response times by ~20% through database query tuning, improving overall system performance and reducing user wait times.

- Html • css • JavaScript • Sql • java • python • Full Stack Development

PROJECTS

Animated Rock-Paper-Scissor Game Github Link

- Created a browser-based game using HTML, CSS, and JavaScript, featuring animated gestures and real-time score updates for 100+ plays during testing.
- Devised randomized computer moves, ensuring 100% fair gameplay and enhancing replay value.
- Applied DOM manipulation to create a fully responsive interface, improving load speed by 15%.

Student Data Management System

- Designed a role-based student data management system using HTML, CSS, PHP, and MySQL with XAMPP, managing 500+ student records in testing.
- Integrated separate login access for students and admins with CRUD functionality, reducing manual data handling by 40%.
- Enabled students to view personal data and admins to manage records with zero reported errors during pilot run.
- Gained practical experience in form handling, secure database integration, and backend validation.

Book Store API Github Link

- Engineered a Book Store API using Spring Boot and MySQL, deployed on AWS EC2 with Docker, processing 100+ simulated book purchases.
- Built secure authentication and role-based access for Admins and Users, achieving 100% login success rate in testing.
- Automated inventory updates, reducing manual stock adjustments by 100%.
- Provided admin dashboard to track users, monitor issued books, and manage inventory efficiently.

ToDo Application

- Constructed a task management system using Spring Boot and the H2 in-memory database, handling 200+ daily tasks during trials.
- Implemented create, view, update, and delete task features with a 99% save accuracy rate.
- Designed tasks to include title, description, and completion status for improved organization.
- Optimized for rapid testing and deployment, reducing setup time by 70% compared to external DB solutions.

Portfolio Github Link

- Designed and implemented a responsive, single-page application using React.js and Tailwind CSS.
- Integrated smooth animations and interactive elements to enhance user engagement.
- Optimized for performance and SEO, ensuring fast load times and improved visibility.
- Deployed on GitHub Pages, providing a professional online presence accessible via Link.
