SUMMARY

CNC Operator & Fabricator with 3+ years of experience in CNC machine operation, setup, programming, and fabrication work. Skilled in machine handling, program adjustments, precision component production, and quality inspection. Strong attention to detail, problem-solving skills, and commitment to safety and quality standards. Experienced in working efficiently with teams to meet production targets and deadlines.

EXPERIENCE

CNC Machine Operator & Fabrication Technician 2024 - 2026
Sakthi Auto Component Limited

- Operated and monitored CNC machines for precision cutting and production.
- Set up machines, loaded materials, and adjusted machine parameters as required.
- Performed basic CNC programming and program adjustments.
- Handled fabrication, cutting, drilling, grinding, and finishing work.
- Conducted quality checks to ensure accurate dimensions and proper finishing.
- Identified and resolved basic machine and production issues.
- Followed workplace safety procedures and maintained a clean work area.
- Coordinated with team members to complete production work on time.

CNC Machine Operator 2020 - 2021
Sakthi Auto Component Limited | TIRUPUR

- Set up and operated CNC machines to produce precision components per specifications.
- Read and interpreted technical blueprints and schematics to configure machine parameters.
- Conducted quality inspections using precision measuring tools to ensure product accuracy.
- Performed routine maintenance, including lubrication, calibration, and cleaning, to maintain optimal machine performance.
- Identified and resolved mechanical and software issues to minimize downtime.
- Optimized workflows, reducing production time while maintaining quality standards.
- Proficient in CNC machine setup, including interpreting blueprints, tool selection, and parameter configuration.
- Skilled in basic G-code and M-code programming, real-time process monitoring, and efficient material handling.
- Maximizing productivity and minimizing downtime while ensuring safety and precision.
- Measurement techniques using tools like calipers, micrometers, and CMMs.
- Experienced in conducting in-process and final inspections to ensure product conformity.
- Knowledgeable in tolerance standards, fits, and finishes as per industry norms.
- Expert at identifying root causes of defects and implementing effective corrective measures, proficient at maintaining detailed inspection records.
- Performed routine maintenance, troubleshooting mechanical and software issues, tool management, machine calibration, and preventive maintenance to ensure optimal CNC machine performance and minimize downtime.

Apprentice CNC Operator 2018 - 2019
Sakthi Auto Component Limited | TIRUPUR

- CNC machine setup and operation.
- Programming and program adjustment.
- Precision measuring tools.
- Reading and interpreting technical/engineering drawings.
- Equipment troubleshooting and maintenance.
- Adherence to safety and quality standards.

EDUCATION

DOTE, Mechanical Engineering | PAAVAI Polytechnic College | (GPA: Percentage : 64.87) 2015 - 2017

SKILLS

- **Core Skills:** CNC machine setup and operation, Programming and program adjustment, Precision measuring tools, Reading and interpreting technical/engineering drawings, Equipment troubleshooting and maintenance, Adherence to safety and quality standards, Machine handling, Program adjustments, Precision component production, Quality inspection, Measurement techniques (calipers, micrometers, CMMs), G-code and M-code basics, Tool selection and parameter configuration, Preventive maintenance
- **Languages:** English, Tamil
