B.Tech - Artificial Intelligence & Data Science

8807639300 | sanjayyt944@gmail.com | linkedin.com/in/sanjay-t2006 | github.com/sanjay-aitech

PROFESSIONAL SUMMARY

AI & Data Science undergraduate with hands-on experience in AI applications and backend development. Skilled in building practical solutions using modern technologies, with experience in hackathons and real-world projects. Seeking opportunities to apply my skills, solve challenging problems, and continuously grow as a software and AI developer.

EDUCATION

B.Tech Artificial Intelligence and Data Science — **2023 - 2027**
Kongunadu College of Engineering and Technology — CGPA : 8.33

Higher Secondary (Class XII) — **2023**
Government Higher Secondary School — 85%

SKILLS

Programming : Python, SQL

AI Technologies: LLMs, Retrieval-Augmented Generation (RAG), Prompt Engineering, Google ADK, MCP

Backend & Systems : Flask, Vector DB, LangChain, LangGraph, Hugging Face

Tools & Platforms: Git, Linux

PROJECT

MindMate — ***Python · Flask · MongoDB · Pinecone · LangChain***

- Role-based AI mental wellness assistant for students that provides personalised mental health support via conversational AI.
- Supported emotion-aware, multi-session interactions by capturing sentiment and context through vector embeddings and memory.
- Ollama local model deployed with RAG pipelines, secure authentication for scalable backend operation.

Syllabex — ***LangChain · Pinecone · Groq API***

- Built a syllabus-restricted RAG AI system as the RAG ChatAI Developer, generating answers solely from institution approved academic content eliminating hallucinations and internet leakage.
- Designed role-based access control (students, faculty, admins) with secure authentication and audit ready logging.
- Governed AI architecture enforces academic compliance and prevents misuse, ensuring trustworthy AI responses tailored for education.

EXPERIENCE

Generative AI Intern - DigiDARA Technologies Pvt. Ltd. — **2025.05 – 2025.07**

- Developed MindMate, a role-based AI mental health assistant for personalised student support with multi-session, context-aware interactions.
- Implemented using LLMs, RAG pipelines, vector databases, LangChain, LangGraph, and backend orchestration techniques.

ACHIEVEMENTS

- SIH 2025 - National Finalist
- CMR Hackfest 3.0 - 1st Runner-Up (60k prize)
- AMD Slingshot Regional Demo Day 2026 - Top 10 Team (Tamil Nadu)
- AI Impact Buildathon (GUVI & HCL) - National Finalist
- VIT Bhopal Health Hackathon - National Finalist
