CAREER OBJECTIVE

Motivated and technically skilled Full Stack Developer with hands-on experience in Java, HTML, CSS, JavaScript, Oracle SQL and Spring Boot. Dedicated to building efficient, user-centric applications and solving real-world problems through innovative and scalable solutions. Seeking an entry-level software role in a collaborative and dynamic environment.

EDUCATION

B. E – Electronics and Communication Engineering
Adhiyamaan College of Engineering, Hosur | 2021 – 2025 | CGPA: 8.46
HSC (XII) – Sri Vinayaga Matric Hr. Sec. School, Namakkal | 2021 | 83.4%
SSLC (X) – Sri Vinayaga Matric Hr. Sec. School, Namakkal | 2019 | 78.6%

PROJECTS

Vehicle Anti-Theft Detection Using Facial Recognition and IoT Notification (Python, OpenCV, Haar Cascade, Arduino Nano, Embedded C, IMAP Protocol)
Developed a biometric vehicle security system that restricts ignition access to authorized users using facial recognition. Implemented OpenCV and Haar Cascade for real-time face detection. Integrated Arduino Nano and IoT-based alert notifications through IMAP protocol. Enhanced system reliability with LCD status display and automated intrusion response.

Food Order Application Backend ***(Java, Spring Boot, JSON, REST API, HTTPS)***
Developed a backend system for a food ordering application using Spring Boot. Designed RESTful APIs to manage food ordering, customer accounts, hotel operations, and delivery modules. Ensured secure data transmission using HTTPS and optimized JSON-based communication for efficient client-server interaction.

Slayit E-Commerce Web Application ***(HTML, CSS, JavaScript, REST API, Responsive UI)***
Developed a responsive e-commerce website featuring product listing, category-based browsing, and dynamic product loading using API integration. Implemented interactive UI components, product filtering, and smooth navigation for improved user experience. Optimized frontend performance using asynchronous JavaScript and modular code structure. Designed visually engaging layouts for electronics, fashion, and jewellery sections.

TECHNICAL SKILLS

- Programming Languages : Java, JavaScript
- Framework : SpringBoot, Bootstrap
- Web Technologies : HTML, CSS, React.js
- Tools & Platforms : GitHub, VS Code, Eclipse
- Database : MySQL, Oracle.

CERTIFICATIONS

- Java Full Stack Course – J Spiders, Bangalore
- Data Analytics – NoviTech R&D Private Limited
- Paper Presentation – Vehicle Anti-Theft Detection Using Facial Recognition and IoT Notification – SIMATS Engineering, Chennai

Work Shops

- PCB Design Workshop – IIT Madras
- Visual-Eyes – Kumaraguru Yugam'23
- Campus Ambassador – Rinex

Soft skill

- Strong problem-solving skills
- Good communication and teamwork
- Quick learner & adaptive
- Ability to work under deadlines

Interests

- Web Application Development
- Front-End UI/UX Design
- Mobile App Development
- Database Management & SQL Query Optimization

Languages known

- Tamil
- English
