CAREER OBJECTIVE

Computer Science Engineering (AI & ML) undergraduate with hands-on project and internship experience in Machine Learning, Deep Learning, Computer Vision, and Data Analysis. Proficient in Python with practical experience in TensorFlow, PyTorch, Scikit-learn, Pandas, NumPy, OpenCV, and SQL. Strong foundation in data preprocessing, machine learning algorithms, model development, training, and evaluation. Seeking an entry-level Machine Learning Engineer or AI/ML Engineer role to develop scalable AI solutions and solve real-world problems.

SKILLS

- **Languages:** Python , Java , SQL
- **ML / DL Frameworks:**TensorFlow, PyTorch, Scikit-learn, OpenCV, Pandas, NumPy, Keras.
- **Domain:** Supervised & Unsupervised Learning, CNN, Computer Vision, Deep Learning, Generative AI.
- **Tools:** VSCode, Jupyter Notebook, GitHub, Google Colab.
- **Soft Skills:** Communication, Teamwork, Problem-solving, Time Management.

WORK EXPERIENCE

Machine Learning Intern — Unified Mentor Pvt Ltd | Remote | Jul 2026 – Oct 2026

- Worked on an end-to-end machine learning and data analysis project, covering data preprocessing, exploratory data analysis (EDA), feature engineering, model development, and performance evaluation on a real-world dataset.
- Built and evaluated predictive models in Python using Pandas, NumPy, and Scikit-learn, applying standard ML metrics to assess performance.
- Documented project findings, methodology, and results, strengthening reporting and technical communication skills.

PROJECT

AI-Powered Fake Image & Video Detection System | Python, TensorFlow, PyTorch, CNN, Deep Learning

- Developed an AI-powered deepfake detection system using CNN-based deep learning to identify manipulated images and videos for digital media authenticity verification.
- Improved model accuracy by 10% through hyperparameter tuning, achieving a 94% F1-score on test data.
- Performed end-to-end data preprocessing, hyperparameter tuning, model evaluation, and optimization to improve classification performance.

AI-Based Drowsiness Detection System | Python, OpenCV, TensorFlow, Keras, CNN, Computer Vision

- Built a real-time driver drowsiness detection system using OpenCV, TensorFlow, and CNN to improve driver safety
- Trained a CNN model on 4,000 facial images, achieving 98% detection accuracy for eye-state classification.
- Implemented Eye Aspect Ratio (EAR) calculation with 21-point facial landmark tracking to detect eye closure and fatigue.
- Integrated dual alert mechanisms (audio and visual) to warn drivers in real time when drowsiness was detected.

ACADEMIC QUALIFICATIONS

Bachelor of Engineering in Computer Science (AIML)

- Velalar College of Engineering and Technology, Erode | CGPA: 6.67 (Up to 6th Semester) | Year: 2023 – 2027

Higher Secondary Education

- Nirmala Higher Secondary School, Kolathur | Score: 68% | Year: 2023

CERTIFICATIONS

- **TCS iON Career Edge – Generative AI Essentials** – AI/ML foundations, prompt engineering | TCS iON, 2026.
- **Introduction to Deep Learning with Keras** – Neural networks, backpropagation, model optimization | 2026.
- **Introduction to Generative AI** – LLMs, transformer architectures, generative AI applications. | 2026.
- **Innovating with Google Cloud AI** – Cloud AI/ML solutions and scalable infrastructure. | Google Cloud, 2026.

ACHIEVEMENTS

- **Smart India Hackathon** (SIH) – Inter-College Level: Participated in a national-level hackathon, gaining hands-on experience in rapid problem-solving, cross-functional teamwork, innovative solution development, and technical collaboration under time constraints.
