EXPERIENCE

Data & ML Research Intern *Jun 2024 – Jul 2024*
DRDO — Defence Research & Development Organisation, Hyderabad

- Engineered backend data pipelines in Python and FastAPI to feed large datasets into predictive web structures.
- Built analytics dashboards that translated model validation metrics (Precision, Recall, F1-score) into intuitive visual interfaces.
- Cut application response latency through data cleaning, feature selection, and MySQL query optimisation.

PROJECTS

Farmers Market — Farm-to-Customer Marketplace (flagship) | Live | Code

- Full-stack MERN marketplace connecting farmers directly with consumers, removing middlemen; MongoDB, Express, React, Node.js.

Movie Compass — Movie Discovery App | Live | Code

- React + Vite + Framer Motion app on the TMDB API with inline hover-play trailers; search across 600,000+ titles without a page reload.

Stock Predictor — ML Web App | Code

- scikit-learn Random Forest predicting a stock's next-day move from engineered indicators, served through a Streamlit dashboard with a CLI trainer.

HomelabGear — Programmatic-SEO Site | Code

- Astro site where one product database generates hundreds of SEO pages targeting real buyer-intent search queries.
