SUMMARY

Final-year Computer Science and Design undergraduate with hands-on experience in Full Stack Development (MERN), Java, Spring Boot, REST APIs, WebSockets, and Machine Learning. Built and delivered production web applications, multi-tenant SaaS backends, and AI-powered accessibility solutions through internships and real-client projects. Seeking Software Engineer, Full Stack Developer, or Backend Developer roles.

EDUCATION

B.E. Computer Science and Design, KSR College of Engineering 2023 – 2027

CGPA: 7.7/10

Coursework: Data Structures & Algorithms, OOP, DBMS, Software Engineering, Web Technologies, Machine Learning, UI/UX Design

Higher Secondary (Computer Science), Sri Sathya Sai Matric Hr. Sec. School 2022 – 2023

72%

SKILLS

Languages: Java, Python, JavaScript (Programming) – Tamil, English, Telugu (Spoken)
Backend: Spring Boot, REST APIs, WebSockets, Node.js, Express.js, JWT Auth, RBAC
Frontend: React.js, Vite, Tailwind CSS, Material UI
Databases: MySQL, PostgreSQL, MongoDB
ML/AI: TensorFlow, Scikit-learn
Tools: Git, GitHub, GitLab, Postman, Figma, VS Code, N8N, Vercel

EXPERIENCE

Backend Developer Intern Jan 2025 – Jun 2025

GK Digital Hut

- Developed backend functionalities and REST APIs for an e-commerce application, integrating frontend, backend, and database operations.
- Participated in testing, debugging, and deployment activities.

Data Analytics Intern Jun 2025 – Jul 2025

OneYes Solutions

- Analyzed IoT traffic datasets using Python and SQL, performing data cleaning, preprocessing, and exploratory analysis.
- Generated analytical reports and insights for decision-making.

PROJECTS

Bill Book – Inventory & Billing System — MERN Stack

- Delivered a full-stack GST-aware billing and inventory platform for a real client with PDF/Excel export, JWT authentication, and dashboard analytics. Live Demo

DigiWarranty – Digital Billing & Warranty Management SaaS — MERN Stack

- Building a multi-tenant SaaS with QR/OTP-based warranty verification and a full service-request lifecycle; implemented store-level tenant isolation and role-based access control (JWT + bcrypt). GitHub Repository

Student Performance Analytics – Python, Machine Learning

- Developed a machine learning-based analytics system to evaluate student performance using data preprocessing and predictive analytics on educational datasets. GitHub Repository

Transit – Logistics Platform Redesign — UI/UX, Figma

- Redesigned a Delhivery-inspired logistics platform: built an interactive HTML prototype, then rebuilt it as an 11-screen Figma file for end-to-end UI/UX flow validation. Figma

ACHIEVEMENTS

- Accessible Learning Platform recognized as Best Project, Department-wise.
- Certifications: Python Programming, Machine Learning (Udemy), Cloud Computing (NPTEL); Class Representative, active LeetCode practitioner.
