Professional Summary

B.Tech Information Technology final-year student with **intermediate proficiency in Java** , experienced in software development through a **Java Development Internship** and AI-driven projects including **AlphaAgent** and **IntelliAssist**. Skilled in **object-oriented programming, database-driven development, AI integration, and problem-solving**, with strong **communication, teamwork, adaptability, and quick learning** skills. Seeking a **Software Engineer** role.

Technical Skills

Programming Languages: Java
Core Concepts: Object-Oriented Programming (OOP)
Web Technologies: HTML5, CSS3, JavaScript
Database: MySQL
Version Control: Git, GitHub

Projects

AlphaAgent – Autonomous Equity Research Bot

- Engineered an autonomous equity research bot using **Java and Python**, integrating **3+ REST APIs** to collect and process stock, market, and financial data while automating the research workflow.
- Implemented automated data processing and **AI-driven summarization** to transform raw financial data into **structured research reports**, reducing manual effort across multiple stages of equity analysis.

IntelliAssist – AI-Powered Enterprise Knowledge & Productivity Assistant

- Engineered a secure enterprise AI platform for document ingestion, semantic search, and **RAG-based context-aware question answering**, supporting **6+ AI-powered productivity workflows** including document, meeting, email, SQL, and code assistance.
- Implemented **multi-tenant data isolation, audit logging, and automated document processing**, integrating vector-based retrieval to deliver secure and context-aware enterprise knowledge access.

Internship Experience

Java Development Intern, Blackflux Technologies – Chennai Dec 2025 – Jan 2026

- Developed and enhanced **3+ Java-based application components** using Core Java and object-oriented programming principles, contributing to structured and maintainable software development.
- Collaborated with a **4-member development team** to implement application tasks, troubleshoot issues, and follow software development practices under technical mentorship.

Web Development Intern, Trains Software Technologies & Institute Jan 2025

- Developed responsive web pages using **HTML, CSS, and JavaScript**, implementing structured layouts and interactive UI components as part of industry-supervised development training.
- Built and refined multiple frontend components through hands-on implementation, strengthening proficiency in **responsive design, client-side scripting, and web development fundamentals**.

Education

Excel Engineering College (Autonomous), Tamil Nadu 2023 – 2027
B.Tech – Information Technology

- **CGPA:** 8.0

Govt. Boys Higher Secondary School, Tiruchengode 2023
Higher Secondary (12th)

- **Percentage:** 84.3%

Certifications & Activities

- **Mobile App Development Workshop** | Kurukshetra '25, CEG Anna University | Feb 2025
- **National-Level Technical Symposium – Pinnacle 2K24** | Coimbatore Institute of Technology | Mar 2024
- **Full Stack Development – 30 Days MasterClass** | NoviTech R&D Pvt. Ltd. | Jan 2026
- **Mastering Java Essentials** | L&T EduTech / LearnKonnect | Jan 2025
