# VIKAS V

**Python Full Stack Developer**

Karur, Tamil Nadu, India — +91 73394 01666 — vikas.v0205@gmail.com
https://www.linkedin.com/in/vikas-v-068aa8343/ — https://github.com/vikas0205

## SUMMARY

B.Tech graduate in Artificial Intelligence and Data Science with hands-on experience in Python full stack development, AI/ML model deployment, and database management. Proficient in building end-to-end web applications using Python, Django, HTML, CSS, and JavaScript. Strong foundation in SQL, Git-based version control, deep learning (LSTM), and LLM/RAG architectures. Seeking an entry-level Software Developer role with a focus on backend and full stack development.

## TECHNICAL SKILLS

| | |
|---|---|
| **Languages** | Python, SQL, JavaScript |
| **Web / Frontend** | HTML5, CSS3, Bootstrap, JavaScript (ES6) |
| **Backend** | Django, Django REST Framework, REST APIs |
| **Databases** | Oracle SQL, SQLite, MySQL |
| **AI / ML** | LSTM, LLM, RAG, Generative AI, NLP, TensorFlow, PyTorch |
| **Libraries** | Pandas, NumPy, Matplotlib, Seaborn |
| **Tools** | Git, GitHub, Jupyter Notebook, VS Code, Postman |
| **Concepts** | OOP, MVC/MVT Architecture, REST APIs, Version Control, Agile Basics |

## EXPERIENCE

**Generative AI Intern – Zepher Technologies, Bangalore** 2024 — 1 Month

- Developed and deployed Generative AI prototypes using LLM frameworks for intelligent text generation and automated response pipelines.
- Engineered Python-based backend services and integrated AI models into web applications for real-time inference and user interaction.
- Built and optimized data pipelines in collaboration with cross-functional teams, improving AI model performance and system reliability.
- Gained hands-on experience with API integration, backend service design, and deploying ML models in a production-like environment.

## PROJECTS

**Python Full Stack To-Do Web App** *Python, Django, SQLite, HTML, CSS, Bootstrap, JavaScript, Git*

- Developed a full-featured task management web application using Django MVT architecture with CRUD operations, user authentication, and session management.
- Designed a responsive frontend using HTML5, CSS3, Bootstrap, and JavaScript for dynamic user interactions.
- Implemented Django ORM for SQLite database operations and developed RESTful endpoints consumed by the frontend JavaScript layer.
- Managed the project lifecycle on GitHub using feature branches, clean commits, and pull-request practices.

**Commodity Price Prediction – LSTM + LLM with RAG** *Python, TensorFlow, PyTorch, LangChain, RAG*

- Architected a hybrid deep learning pipeline combining LSTM time-series networks with LLM and Retrieval-Augmented Generation (RAG) for commodity price prediction.
- Integrated external knowledge sources through RAG to enrich prediction context and improve model generalizability.
- Built interactive visualizations using Matplotlib and Seaborn to present prediction outputs and insights.

**Real-Time Fake News Detection System** *Python, TensorFlow, LSTM, NLP, Flask*

- Designed a real-time streaming fake news detection system using LSTM-based NLP models for low-latency text classification.
- Preprocessed and vectorized large-scale news datasets using tokenization, embeddings, and padding techniques.
- Exposed the trained model through a REST API using Flask, enabling integration with frontend interfaces.

## EDUCATION

**B.Tech – Artificial Intelligence and Data Science** 2022 – 2026
Sengunthar Engineering College, Namakkal, Tamil Nadu CGPA: 7.8

## SOFT SKILLS

Team Collaboration — Problem-Solving — Adaptability — Attention to Detail — Continuous Learning

## LANGUAGES

English — Tamil (Native)
