VISHNU PRIYA Y

Data Scientist | AI/ML | Cloud (AWS) | Python

vishnupriya8886@gmail.com • +91-7010788869 • GitHub • LinkedIn • Portfolio

PROFESSIONAL SUMMARY

ECE graduate (2026) working as a Data Scientist, building machine learning and deep learning models with Python, TensorFlow, NumPy, and Pandas, backed by strong statistical foundations. Hands-on background in cloud infrastructure and DevOps automation on Amazon Web Services (EC2, EKS, S3, Lambda), with Terraform/Ansible provisioning and Jenkins CI/CD pipelines. Actively preparing for the AWS Certified Solutions Architect certification.

TECHNICAL SKILLS

Data Science & AI/ML: Python (NumPy, Pandas, Scikit-learn), Statistics, Machine Learning, Deep Learning, TensorFlow, Model Building & Evaluation, AIOps / Anomaly Detection

Cloud — Amazon Web Services (AWS): EC2, S3, RDS, Virtual Private Cloud (VPC), AWS IAM, Elastic Kubernetes Service (EKS), ECS / Fargate, AWS Lambda, Amazon CloudWatch, Route 53

DevOps & IaC: Docker, Kubernetes, Terraform, Ansible, Jenkins, CI/CD Pipelines, Linux

Monitoring & SRE: Amazon CloudWatch, Prometheus, Alert Management, SRE Fundamentals

Frontend: HTML, CSS, JavaScript

Tools: Git, GitHub, VS Code, YAML, Dockerfile / K8s Manifests, Jupyter Notebook

WORK EXPERIENCE

Data Scientist | *Arrow Thought, Chennai* **Sep 2026 – Present**

- Build and evaluate machine learning and deep learning models using Python, TensorFlow, NumPy, and Pandas to address business problems.
- Apply statistical analysis and data preprocessing techniques to extract insights from large, complex datasets.
- Collaborate with cross-functional teams to integrate ML models into production workflows on AWS cloud infrastructure.

Cloud Intern | *Cloud Institution, Bangalore* **Jan 2026 – Aug 2026**

- Provisioned AWS infrastructure (EC2, S3, RDS, VPC) using Terraform and Ansible, reducing manual setup time by 70% and environment provisioning by 30%.
- Containerized 3+ applications with Docker and orchestrated deployments on Amazon EKS, writing Dockerfiles and K8s manifests (Deployments, Services).
- Designed Jenkins CI/CD pipelines accelerating release cycles by 40% with automated build-test-deploy stages.
- Monitored 10+ cloud resources using Amazon CloudWatch and Prometheus with proactive alerting and incident response.

Front-End Developer Intern | *White & Box Tech Products & Services, Bangalore* **Jun 2025 – Aug 2025**

- Learned core front-end development concepts (HTML, CSS, JavaScript) and applied them to build a Letterboxd-inspired movie website in collaboration with the backend team.
- Collaborated via GitHub for version control, CI integration, and feature delivery in an agile team environment.

PROJECTS (github.com/Vishnupriyayuvaraj)

Cloud Infrastructure Automation with Terraform — *AWS, Terraform, IaC*

- Designed reusable Terraform modules to provision AWS infrastructure (VPC, EC2, S3, IAM) with version-controlled, repeatable deployments.
- Implemented remote state management and environment-based configurations to streamline multi-environment provisioning.

Prometheus Observability Stack Deployment — *Prometheus, Grafana, Amazon CloudWatch*

- Deployed a Prometheus-based monitoring stack to collect and visualize metrics across cloud infrastructure and containerized workloads.
- Configured alerting rules and dashboards for proactive incident detection, reducing mean-time-to-detect.

AI-Assisted DevOps (AIOps) — *Python, Machine Learning, TensorFlow, Amazon CloudWatch*

- Built an AIOps-driven anomaly detection pipeline in Python to analyze system and log metrics and flag abnormal patterns.
- Integrated automated alerting and root-cause insights into monitoring workflows to reduce manual triage effort.

Mission-Critical Incident Management System — *Python, MySQL, REST API, Amazon CloudWatch*

- Built a real-time IMS with alert escalation, dashboard reporting, RBAC, and integration with cloud monitoring systems. Repo: github.com/Vishnupriyayuvaraj/mission-critical-ims

EDUCATION & CERTIFICATIONS

B.E. Electronics & Communication Engineering (Hons – IoT Specialization)
Adhiyamaan College of Engineering, Hosur | Score: 83% | 2022 – 2026

Certifications: AWS Certified Solutions Architect (in progress) · AI Certification · Rinex (Completed)
