https://www.linkedin.com/in/yengeshwaran-m-94b053287

Summary

Aspiring Software Engineer passionate about developing AI-powered and scalable software solutions using Java, Python, and modern backend technologies. Hands-on experience gained through self-learning, projects, hackathons, and internships, with a strong interest in solving practical engineering challenges.

Education

Mahendra Matric Hr Sec School — Score • 90.5
Computer Science — Namakkal, TamilNadu • March 2023

Knowledge Institute of Technology — B.E • CGPA: 8.1
Electronics and Communication Engineering
Salem, TamilNadu • Expected Graduation: March 2027

Experience

Stack Queue — Namakkal, TamilNadu
AI/ML Intern
- Assisted in AI/ML projects involving data processing and model implementation.
- Collaborated on software development tasks and application improvements.

Cadibal Technologies — Salem, TamilNadu
Full Stack Developer Intern
- Assisted in developing responsive web applications with frontend and backend integration.
- Collaborated on REST API development, debugging, testing, and feature implementation.

Projects

RAG-Based Intelligent Document Question Answering System
Tech Stack: Python, Hugging Face, Pinecone, LLMs
- Developed a document-based question answering system using Retrieval-Augmented Generation (RAG).
- Implemented document chunking, embeddings, semantic search, and LLM-based response generation.
- Improved answer accuracy by grounding responses in retrieved document context.

Reado – Intelligent Document-to-Audio Assistant
Tech Stack: HTML, CSS, JavaScript, PDF.js, Mammoth.js, Web Speech API
- Developed a web application that converts PDF, DOCX, and TXT documents into audio.
- Implemented document summarization and question-answering features for improved accessibility.
- Designed a privacy-first client-side architecture without requiring backend storage.

Medico – Medicine Label Explainer
Tech Stack: Python, Streamlit, Tesseract OCR, Ollama
- Developed an application to extract medicine label text using OCR and explain it in simple language.
- Integrated a local LLM to provide dosage, usage, and precaution information offline.
- Designed an intuitive interface focused on accessibility and privacy.

Certifications

Python for AI and Data Science

Gen AI Academy 2.0 – AI/ML Track

AI for Bharat – Serverless Applications using Gen AI on AWS

Google for Startups – Prompt to Prototype

TCS iON Career Edge – Young Professional

Postman API Fundamentals

Skills

- Programming Languages: C, Java, Python, JavaScript
- Web Technologies: HTML, CSS, Tailwind CSS, React (Basics), Node.js (Basics)
- Backend: REST APIs, FastAPI, SQL
- AI & Cloud: AWS Cloud, RAG Fundamentals, Prompt Engineering, Ollama, Basic Model Finetuning, API Testing & Integration
- Tools: Git, GitHub, VS Code, Postman, Hugging Face, Docker (Basics), Jira

Hackathons & Competitions

Decodex 2026 Finalist

Agentic Day - HackerEarth

SAE DDC 2026 – RC Aircraft Development Competition

Extra Curicular

AR & VR paper Presentation - Hindustan college of Technology

Volunteer – Road Safety Awareness Bike Rally (Organized by Salem City Police) | Jan 2026

Languages

Tamil, English
