PROFILE

I am a B.Tech student specializing in AI and Data Science with a hands-on background in training machine learning models and building intelligent agent workflows. I focus on taking advanced technologies—like Generative AI and Agentic AI and turning them into practical, production-ready applications that solve real-world problems.

EDUCATION

Bachelor of Technology (B.Tech) – Artificial Intelligence and Data Science
Gnanamani College of Technology, Namakkal, Tamil Nadu
Higher Secondary Education
Mahadev Vidhyalaya Higher Secondary School, Tiruchengode
Percentage: 85%

CERTIFICATIONS

- AI-ML Professional Certification – Skill India Digital Hub
- ISO Certified
- Python-Great Learning platform

ACHIEVEMENTS

- Paper Presentations
- Workshops
- Intern Project Leadership
- Hackathons

TECHNICAL SKILLS

- Programming: Python
- Machine Learning:Supervised Learning, Unsupervised Learning, Model Evaluation,
- Feature Engineering, Predictive Modeling
- Deep Learning: Convolutional Neural Networks (CNN), Neural Networks, Hyperparameter Tuning.
- Generative AI: Prompt Engineering, Large Language Models (LLMs), Retrieval-Augmented Generation (RAG)
- Agentic AI Frameworks: CrewAI, LangChain, Multi-Agent Systems, Langraph.
- Libraries: NumPy, Pandas, Scikit-learn, Matplotlib,Seaborn,Opencv.
- Tools: Power BI, Fast Api, GitHub, Google Colab, VS Code,Claude,Supabase,Snowflake,Docker.

SOFT SKILLS

- Problem Solving
- Quick Learning
- Adaptability
- Team Collaboration
- Analytical Thinking

PROJECTS

CNN-Based Food Recommendation System

- Built a CNN model to identify food items from images and recommend suitable food options.

Gold Price Analyzer using CrewAI

- Developed a multi-agent system to analyze gold price trends and generate automated insights.

Quantum Encryption & Decryption using PQC

- Implemented quantum-safe encryption concepts and secure communication workflows.

AI Smart Office — Face Recognition Attendance System

- Automated employee attendance by identifying registered faces through a camera.

EXPERIENCE

Machine Learning Intern — Corizo EduTech (Remote) 15 Feb 2025 – 15 Mar 2025

- Gained practical experience in Python, Pandas, NumPy, and Scikit-learn.
- Applied machine learning algorithms for prediction and classification problems using Python.
- Worked on feature engineering and model evaluation to improve model performance.
- Analyzed datasets to identify patterns, trends, and data-driven insights.

Machine Learning Intern – Cognifyz Technologies (Remote)April 2025 – May 2025

- Built predictive models using supervised learning algorithms for business use cases.
- Identified patterns and trends from structured datasets.
- Applied machine learning algorithms for prediction and classification tasks using Python and Scikit-learn.

Machine Learning Intern – CodeTech IT Solutions (Remote) May 2025 – June 2025

- Performed data cleaning, preprocessing, and feature engineering to improve model performance.
- Evaluated models using accuracy, precision, recall, and F1-score metrics.
- Collaborated in a remote agile environment to ensure timely project delivery.

GenAI Developer Intern – DataRevealAI (Full-Time) February 2026 – August 2026

- Worked with AI agents and automation workflows to improve task execution and reduce manual processes.
- Integrated AI models with application components, APIs, and data sources.
- Collaborated on AI projects involving LLMs, agentic AI, and intelligent automation.
- Built and integrated RAG-based solutions for retrieving and generating context-aware responses.
