Profile Summary

Software Engineer with about 1 year of experience across HTML email engineering and Python development. Hands-on with Python, Flask, SQL, and machine learning through professional work and AI projects. Seeking roles in Python Development, AI/ML, or Data Engineering.

Skills

Programming Languages: Python, JavaScript, SQL, HTML, CSS

Technologies & Tools: Full Stack Web Development (HTML, CSS, JS, Flask), AI & Machine Learning (NumPy, Pandas, Scikit-learn, TensorFlow), Database Management (Oracle SQL, MySQL), Version Control DevOps (Git, GitHub, Docker), Development Tools (Visual Studio Code, Jupyter Notebook), Email Technologies (HTML Email Development, Cross-Client Email Testing, Email Deliverability)

Projects

Expense Tracker REST API *July 2026 - September 2026*

Tools: Python, Flask, SQLAlchemy, SQLite, JWT, marshmallow, pytest [GitHub]

- Built a REST API with user registration, JWT authentication, and CRUD endpoints for expenses and categories.
- Implemented filtering, pagination, and a category-wise spending summary with request validation using marshmallow.
- Wrote 15 pytest tests covering authentication, validation, and per-user data isolation.

Optimizing Tourism Management System with Multilingual Voice Assistant *Jan 2025 - May 2025*

Tools: Python, Flask, HTML, CSS, JavaScript, MySQL, gTTS, Dialogflow, LLaMA, GPT

- Built a multilingual tourism platform with chatbot and voice assistance, increasing tourist engagement and accessibility by 60%.
- Integrated Transformer Models (LLaMA, GPT) to generate context-aware multilingual responses with 90% accuracy.
- Developed an AI-powered recommendation system using collaborative and content-based filtering, enhancing personalized results by 45%.
- Designed admin and user modules with secure login, voice interface, and offline functionality, improving usability in remote areas by 50%.

Professional Experience

- **Python Developer** *August 2026 - September 2026*
  DivineCore Technology Salem
  - Worked full-time as a Python Developer, writing and debugging Python scripts for data handling & backend tasks.
  - Set up the development environment and worked with the codebase using Git, GitHub, Flask, and SQL.
  - Contributed to the Handshake AI project "Dynamo", building and running Python code in Docker containers.
- **Associate Software Engineer** *September 2025 - June 2026*
  Webberax Solutions Pvt. Ltd. Chennai
  - Developed and maintained responsive HTML email templates using HTML and CSS, ensuring consistent rendering across major email clients and devices.
  - Modified email layouts based on campaign requirements and collaborated with the design team to deliver high-quality email campaigns.
  - Performed email testing, quality assurance, troubleshooting to identify and resolve rendering and delivery issues.

Education

- **Sudharsan Engineering College** *June 2021 - May 2025*
  B.Tech in Artificial Intelligence and Data Science Pudukottai
  - CGPA: 8.2/10

Certifications

- **Creators of Metaverse Student Program (AICTE, Meta, 1M1B)** *March 2025*
- **1st Place in Top Coders Contest (Sudharsan Engineering College)** *April 2024*
- **AWS Academy Cloud Foundations (AWS Academy)** *October 2023*
- **Foundation Of AI and ML Course (TechSaksham, Microsoft)** *July 2023*

Additional Information

Languages: English (Professional Working, Proficiency), Tamil (Native or Bilingual Proficiency)

Soft Skills: Communication, TeamWork, Decision Making
