INTERNSHIP

Gained practical exposure through internships in hardware and software, contributing to technical projects involving embedded systems, coding, and system optimization. Strengthened analytical and implementation skills across domains.

Collaborated with cross-functional teams to deliver efficient, reliable, and scalable technical solutions within project deadlines.

PROJECT

Cardiac death detection using pulse sensor

Developed a real-time heart rate monitoring system using pulse sensor and microcontroller to detect abnormal heart rate conditions. Implemented threshold-based alert mechanism to identify potential cardiac risks. Focused on improving accuracy and response time.

ONLINE FLIGHT TICKET BOOKING USING HTML,CSS,SQL,REACT JS

Designed and developed a full-stack web application using HTML, CSS, React JS, and SQL. Implemented user authentication, flight search, booking, and database management functionalities. Ensured responsive UI and efficient backend data handling
