SAISON B

Software Engineer

9345561179 | saisonavm1997@gmail.com | Portfolio | GitHub | LinkedIn | LeetCode

PROFESSIONAL SUMMARY

Software Engineer specializing in the MERN stack with hands-on experience building responsive web applications, RESTful APIs, and backend services using React.js, Node.js, Express.js, and MongoDB. Strong foundation in Data Structures and Algorithms, with 500+ problems solved on LeetCode. Proven ability to design, develop, and deploy scalable software solutions in fast-paced, real-world environments.

TECHNICAL SKILLS

Languages: Python, JavaScript, Java, PHP

Frontend: React.j, HTML5, CSS3, Tailwind CSS, Responsive Web Design

Backend: Node.js, Express.js, REST API Development, PHP

Databases: MongoDB, MySQL

Tools & Platforms: Git, GitHub, VS Code, Linux, Postman

Cloud & Deployment: Custom domain hosting & deployment, CI/CD basics, API integration

EDUCATION

Nandha Engineering College — B.Tech, Information Technology

2023 – Present | CGPA: 8.2 / 10.0

EXPERIENCE

MERN Stack Intern — Brainery Spot Technology

June 2025 – July 2025

- Developed full-stack web applications using the MERN stack (MongoDB, Express.js, React.js, Node.js), implementing responsive, reusable UI components.
- Designed and integrated RESTful APIs with MongoDB, streamlining data handling and frontend-backend communication.

Software Development Intern — MIST Solution

December 2024 – January 2025

- Built backend services with PHP and MySQL, ensuring secure data management and efficient server-side processing.
- Engineered RESTful APIs for frontend-backend integration, improving data exchange speed and system reliability.

PROJECTS

AI-Powered Placement Assistant | *React, JavaScript, Gemini API*

- Built a full-stack web app to help students prepare for placements by generating tailored interview questions, resume feedback, and coding suggestions via the Gemini API.
- Designed a React-based UI with dynamic, real-time AI responses, deployed live on a custom subdomain for public access.

Offline AI Crop Assistant | *React Native, TensorFlow Lite, JavaScript*

- Built an offline AI-powered mobile application for crop disease detection and crop recommendations without relying on cloud APIs or internet connectivity.
- Built an offline AI app for crop disease detection and treatment recommendations using TensorFlow Lite.

Traffic Sign Recognition System | *Python, TensorFlow/Keras, OpenCV*

- Built a CNN-based image classification model to detect and classify traffic signs from the GTSRB dataset, achieving 90%+ accuracy.
- Implemented real-time webcam-based detection, demonstrating practical computer vision and deep learning application.

CERTIFICATIONS

- Python Programming Certification — Infosys
- Full Stack Web Development (MERN Stack) — IFC

ACHIEVEMENTS & CODING PROFILES

- Solved 500+ Data Structures & Algorithms problems on LeetCode.
- Won 2nd Prize, Code Hunt — Coimbatore Institute of Engineering and Technology (CIET).
- Awarded 2nd Prize at the Hackathon organized by Nandha Engineering College.
- Attended Python Programming Workshop organized by IIT Madras.
