Career Objective

Motivated and detail-oriented Electronics and Communication Engineering student with knowledge of Core Java, database systems, battery pack design, and electric vehicle technology. Seeking an entry-level Software Engineer position where I can apply my technical skills, enhance my problem-solving abilities, and contribute to innovative projects while continuously learning and growing in a dynamic environment.

Education

B.E. Electronics and Communication Engineering
Erode Sengunthar Engineering College (2023-2027)
CGPA: 7

Aadharsh Vidhyalaya Matric. Higher Secondary School (2021-2023)
Percentage: 65.67%

Workshops

- Graphic Design using Photoshop
- Web Development
- Drone Design and Development

Projects

1. **Design and Development of 48V Battery Pack for Electric Vehicle**
   Designed and assembled a 48V LiFePO4 battery pack for an electric vehicle. Planned the series and parallel cell configuration, calculated battery capacity, and understood battery pack design, cell balancing, safety, and battery protection concepts used in EV applications.

2. **48V Electric Three-Wheeler Vehicle**
   Developed a 48V electric three-wheeler using a 48V battery pack, 720W BLDC motor, and motor controller. Worked on battery-pack integration, motor-controller interfacing, wiring, and vehicle assembly to achieve reliable electric propulsion. Tested the vehicle for motor performance, acceleration, and overall system operation.

Skills

Technical Skills	:	• Core Java • Basic Electronics • Battery Pack Design • Electric Vehicle (EV) Technology
Core Skills	:	• Problem Solving • Logical Thinking
Soft Skills	:	• Teamwork • Communication • Quick Learner • Presentation Skills

Languages

- Tamil (Native)
- English (Professional Working Proficiency)
