Executive Summary

Software Developer with a Bachelor's degree in Artificial Intelligence and Data Science, possessing strong expertise in Java, Python, React.js, Artificial Intelligence, Computer Vision, and UI/UX Design. Experienced in developing AI-powered applications, responsive web solutions, and accessibility-focused software through academic, freelance, and internship experience, with a strong focus on scalability, innovation, and business value.

Education

B.Tech - Artificial Intelligence and Data Science, Sona College Of Technology, Salem. - CGPA: 7.35 **Oct 2021 — May 2025**

HSC - Sishya Matric Higher Secondary School, Tiruvannamalai. - 85.6 **2020 — 2021**

SSLC - Sishya Matric Higher Secondary School, Tiruvannamalai. - 78.6 **2018 — 2019**

Technical Skills

Programming Languages	Java, Python, Java Script.
Frameworks and Libraries	React.js, Flask, FastAPI.
Tools and Software	Figma, Framer, Canva, Cursor, Vercel V0, MS Excel, Visual Studio Code, Pycharm.
Databases	SQL.
AI/ML Techonologies	MediaPipe, OpenCV, PyTorch, Speech Recognition, NLP, Prompt Engineering
Multilingual Abilities	Tamil, English.

Professional Experience

Freelancing - Role : UI/UX Designer **Dec 2024 — March 2025**

Responsibilities:

- Designed and delivered an intuitive e-commerce mobile app interface using Figma, covering wireframes to high-fidelity prototypes.
- Improved product discovery and checkout flow through user-centric design and iterative feedback from stakeholders.
- Managed end-to-end design lifecycle, collaborating with clients to align solutions with business goals.

Impact:

- Improved user navigation efficiency and engagement through structured UI design.
- Delivered project within timelines while meeting client expectations.
- Enhanced usability leading to smoother user journeys and improved accessibility.

Projects

Hand-Gesture Controlled Presentation System

- Developed a gesture-controlled presentation software enabling seamless hands-free slide navigation using real-time hand gesture detection. Enhanced user interaction through innovative gesture-based control systems
- Technology Used: MediaPipe Hands for gesture recognition, OpenCV for image processing, and Python with machine learning for personalized gesture control.

ECHOMAIL : A Voice Driven Mail Service for Visually Challenged People

- Built an intelligent voice-enabled email assistant that leverages Automatic Speech Recognition (ASR), Natural Language Processing (NLP), and Text-to-Speech (TTS) to facilitate hands-free email communication. Implemented voice authentication, inbox management, and real-time audio feedback to enhance accessibility and user interaction.
- Technology Used: Python, SpeechRecognition, pyttsx3, NLP, SMTP, IMAP, JSON, AI-Based Speech Processing.

ESRGAN vs BasicVSR: Comparative Video Super-Resolution System

- Built a deep learning pipeline to upscale low-resolution videos, benchmarking ESRGAN and BasicVSR for fidelity, perceptual quality, and temporal consistency using advanced evaluation metrics.
- PyTorch for model implementation, Google Colab for GPU processing, OpenCV for video handling, FFmpeg for video pre/post-processing, and Python libraries (LPIPS, scikit-image, Matplotlib) for metric computation and visualization.

Certifications

- Certified in C, C++, Java, and Basics of HTML (CSC).
- UI/UX Design Certification(Internshala).
- Foundations of User Experience (UX) Design (Coursera).
- Programming in Java (NPTEL).
- Introduction to Internet of Things (NPTEL).
- Build AI Agents using Google Agent Development Kit (Udemy).
