SUMMARY

Computer Science and Engineering graduate (2026) with CGPA 9.25/10.0. Skilled in Java, Python, SQL, Data Structures, Object-Oriented Programming, Spring Boot, Flask, REST API Development, and Machine Learning. Experienced in building scalable web applications, REST APIs, and AI-driven solutions, having completed 3 end-to-end projects covering full-stack development, backend API design, and machine learning model integration.

EDUCATION

B.E., Computer Science and Engineering • Mahendra Engineering College, Tamil Nadu (CGPA: 9.25 / 10.0) 2022 – 2026

10th Percentage: 77.2% | **12th Percentage**: 77.3%

TECHNICAL SKILLS

- **Languages & Core:** Python, Java, JavaScript, TypeScript, SQL, Spring Boot, React.js, OOP, Data Structures
- **Frameworks & Frontend:** Django, Fast API, Flask, Stream lit, Next.js, React, HTML5, CSS3, Tailwind CSS
- **Databases:** MySQL, PostgreSQL, PL/SQL, MongoDB, SQLite, Database Design, Query Optimization, CRUD Operations
- **ML & AI:** PyTorch, TensorFlow, Scikit-learn, Lang Graph, LLMs (Gemini, Groq), NumPy, Pandas, XG Boost
- **Cloud & DevOps:** AWS (EC2, S3), Git, GitHub, CI/CD Basics, Version Control, Agile/Scrum
- **Tools:** IntelliJ IDEA, Postman, VS Code, Docker (Basics

PROFESSIONAL EXPERIENCE

Oracle APEX Developer Intern - Nainu Startups Edu-Tech, Padur, Tamil Nadu **Nov 2024 - Feb 2025**

- Engineered a full-stack web application using Oracle APEX, SQL, and PL/SQL, delivering complete CRUD functionality across 5+ core business modules.
- Designed normalized relational database schemas and validation rules, improving data integrity and cutting redundant records by 30%.
- Collaborated with a 4-member Agile development team following SDLC best practices, reducing user task completion time by 20%.

Web Development Intern - Cognifyz Technologies **Oct 2025 - Nov 2025**

- Created responsive web applications using HTML, CSS, JavaScript, and React.js, improving page load performance by 25%.
- Strengthened front-end engineering, debugging, and Git version-control skills by resolving 15+ bugs across 10+ web pages.
- Partnered with senior developers to review 20+ pull requests, cutting post-release defects by 18%.

PROJECTS

XEDLAB Clinical - AI Medical Report Analyzer | React, FastAPI, Python, OCR, NLP, RAG | https://github.com/ghkrknkp/XEDLAB-CLINICAL

- Built a full-stack AI medical report analyzer using OCR, NLP, ML, and LLMs to extract, classify, validate, and explain PDF, image, and text reports.
- Implemented an 11-class report classifier, deterministic lab-value validation, abnormality detection, and RAG-based Q&A with source-page citations.
- Developed JWT authentication, rate limiting, CORS, privacy-safe logging, and deployed the application on Render.

Medical AI – AI-Powered Healthcare Platform | GitHub Repository

Technologies: React.js, Tailwind CSS, JavaScript, NLP, Machine Learning, AI APIs, REST APIs, Git, GitHub

- Developed an AI-powered healthcare platform using React.js and NLP for symptom analysis and disease prediction.
- Implemented responsive healthcare features, including medical recommendations, patient support, appointment management, and health monitoring.
- Integrated NLP-based AI functionality to analyses user symptoms and provide intelligent healthcare insights.

AI Multi-LLM Assistant | GitHub

Technologies: Python, Fast API, React.js, OpenAI GPT API, Google Gemini API

- Developed a full-stack AI comparison platform integrating OpenAI GPT and Google Gemini for side-by-side LLM response analysis.
- Built REST APIs with persistent chat history and token-based authentication, along with a responsive React.js interface.

AI Security Vulnerability Auditor | Fresher | Cybersecurity & AI | Python | FastAPI | SAST | DevSecOps | Security Automation

- Built AI-powered security scanning platform using Python, FastAPI, React, and PostgreSQL.
- Integrated Semgrep, Gitleaks, AST analysis, and AI vulnerability detection.
- Implemented risk scoring, remediation, and CI/CD security reporting.

CERTIFICATIONS & ACHIEVEMENTS

- Java, Spring Boot & DSA - Revamp Academy (2024-2025)
- AWS Academy Cloud Architecting (2025)
- Hackathon Winner - Catch 24-25, Mahendra Institute of Technology
- Cisco Networking Fundamentals (2024)
- AI Certification - Infosys Springboard

ABOUT ME

Electronics and Communication Engineering student with hands-on experience in developing practical projects and applications.Strong problem-solving and analytical thinking with a passion for learning and applying technical knowledge.Adaptable and motivated to build real-world solutions and contribute effectively in a professional environment.

EDUCATION

Bachelor of Engineering in Electronics and Communication Engineering | CGPA: 8.1 — 2023-Present
Excel Engineering College — **Namakkal,Tamilnadu**

Higher Secondary Certificate | Percentage: 75% — 2022-2023
Gandhi Matriculation Higher Secondary School — **Namakkal,Tamilnadu**

SKILLS

- Programming: Python, JavaScript
- Web: HTML, CSS, Flask
- Database: MySQL, MongoDB
- Hardware & Embedded: Embedded Systems, Microcontrollers, Arduino, IoT, Sensors
- Tools: GitHub, VS Code, MySQL Workbench

INTERNSHIP EXPERIENCE

Python Programming Intern — **Tamilnadu,India**
CodeAlpha — Jan 2026 - Feb 2026

- Completed virtual internship focused on Python programming and application development.
- Developed Python programs to solve programming tasks and improve automation and improved problem-solving skills using Python.

Data Science Intern — **Tamilnadu,India**
Emglitz Technologies — Jun 2025 - Jul 2025

- Applied Python programming to develop mini-projects involving data handling, basic visualization, and automation.
- Gained hands-on experience in Python-based data processing and implementing practical data science tasks.

PROJECTS

AI-Based Malpractice Detection Web
Technologies: Python, MySQL, YOLOv8, Open CV

- Developed an AI-based online exam proctoring system to detect suspicious activities during examinations.
- Implemented YOLOv8 and OpenCV for real-time detection of mobile phones and multiple persons. Built a Flask-based backend to handle exam monitoring and malpractice detection workflows.

Tournament Management System
Technologies: Python, Flask, HTML, CSS

- Developed a web-based tournament management system to streamline tournament administration.
- Implemented team registration and participant management through a Flask-based application. Built features for match scheduling, tournament updates, and results tracking.

Acting Driver – Driver Booking Website
Technologies: Python, Flask, HTML, CSS, Javascript

- Developed a web-based driver booking platform connecting customers with available professional drivers.
- Implemented driver registration, customer booking, driver profiles, and location-based driver tracking features.Built a Flask-based backend to manage users, driver details, booking workflows, and platform operations.

CERTIFICATIONS AND ACHIEVEMENTS

- 1st Prize in Paper Presentation in Hindustan college of Engineering — Mar 2026
- Wireless Communications Onramp – **MathWorks** — Oct 2024
- Business Analytics Foundations – **L&T EduTech** — Feb 2026
- Introduction to IoT – **Cisco Networking Academy** — Mar 2025
- MongoDB Monitoring & Tooling – **MongoDB** — Jul 2025
