PROFESSIONAL SUMMARY

Computer Science and Engineering Student who builds full-stack, IoT, and Generative AI applications using Python, Java, SQL, and REST APIs. Strong foundation in object-oriented programming, data structures, and cloud. Familiar with developing academic and personal projects and applying programming concepts to solve real-world problems. A quick learner with good problem-solving skills, team work skills, seeking an entry-level Software Developer role to apply my technical knowledge and grow professionally.

TECHNICAL SKILLS

- Programming Languages: Python, C, SQL
- Web and AI/ML Technologies: HTML, CSS, JavaScript, REST API, OpenCV, RAG, LLM
- Core CS Concepts: Object-Oriented Programming, Data Structures, Algorithms, Deep Learning, Cloud Computing
- Tool: VS Code, Arduino IDE

PROJECTS

Intelligent Sensor-Based Home Automation System Using IoT

- Developed a smart home automation system using YOLOv11-based object detection to identify people and unwanted objects through a camera, enabling automated security monitoring and alerts.
- Integrated rain, temperature, and gas sensors with Arduino to detect environmental changes, automate window control based on weather conditions, support temperature-based ventilation, and trigger alerts for gas leakage.

Smart AI-Based Expense Tracker

- Architected a full-stack expense tracking application that automatically categorized transactions using AI, validated on a test dataset of the transactions.
- Built interactive dashboards to visualize spending trends, expenses, and budgets.

Online Food Ordering & Queue Management System

- Delivered a full-stack web application enabling online food ordering, secure online payment processing, and token-based queue management, tested with a sample catalog of 20–50 menu items.
- Modeled a normalized MySQL relational schema and built REST APIs with Spring Boot to handle orders, payments, and live queue status.

INTERNSHIP EXPERIENCE

Generative AI Intern — ATS Company | *Coimbatore*

- Built a document-based Q&A chatbot using LLMs, Retrieval-Augmented Generation (RAG), and LangChain, prompt engineering techniques enabling users to query any uploaded document in natural language.

Web Technologies Intern — CodeBind Technologies | *Coimbatore*

- Developed a responsive product listing page using HTML, CSS, and JavaScript, applying semantic markup and client-side scripting for cross-device compatibility.

EDUCATION

Vivekanandha College of Engineering for Women *2023 – 2027*

- B.E. in Computer Science & Engineering | CGPA: 8.9 (up to 6th Semester)

St. Theresa Girls Hr. Sec. School *2022 – 2023*

- BioMaths - percentage: 92%

CERTIFICATIONS

- Spoken Tutorial, IIT Bombay - Arduino, JavaScript | Udemy - JavaScript, Java, Python
- NPTEL (IIT/IISc Certified) - Design and Implementation of Human Computer Interaction
- Infosys Foundation (ICT Academy) - Certificate of Completion in UI/UX
- Generative AI (GenAI) Certification – Accent Techno Soft

ACHIEVEMENTS

- 1st Prize - Technical Paper Presentation | 2nd Prize - Created creative posters based on assigned ADZAP topics.

ADDITIONAL INFORMATION

- Languages: English (Professional Working Proficiency), Tamil (Native)
- Soft Skills: Communication, Teamwork, Decision Making
