BHOJU ASWIN S A

Nagercoil, Tamil Nadu | +919384969757 | bhojuaswin@gmail.com | LINKEDIN | GITHUB

PROFESSIONAL SUMMARY

Computer Science and Engineering graduate with hands-on technical experience in Full Stack Web Development (MERN, Angular) and DevOps practices. Skilled in building responsive web applications, designing RESTful APIs, configuring containerized environments with Docker, and setting up automated CI/CD pipelines. Strong problem-solving abilities seeking a Software Developer or Full Stack Engineer role.

TECHNICAL SKILLS

Programming: Java, TypeScript, JavaScript, SQL, Python (Basic)

Frontend: Angular, React.js, HTML, CSS, Bootstrap, Material UI, Redux

Backend: Node.js, Express.js, RESTful APIs, Authentication & Authorization

Cloud & DevOps: Docker, AWS EC2, S3, VPC, CloudWatch, Jenkins (Basics), Linux

Tools & Platforms: Git, GitHub, Nginx, FileZilla FTP

Concepts: Frontend-Backend Integration, Responsive UI Design, Deployment Workflows, Structured Data Handling, OOP Concepts, MVC Architecture, Agile Methodology, Version Control, Debugging & Problem Solving, Team Collaboration

PROFESSIONAL EXPERIENCE

Trainee – Frontend & DevOps | TechNeat Info Solutions
September 2025 – January 2026

- Built end-to-end responsive web applications using React.js, Angular, Node.js, and TypeScript.
- Integrated dynamic REST APIs into frontends for structured data handling and real-time operations.
- Managed source code and version control using Git workflows and master/develop branching on GitHub.
- Deployed microservices and hosted web applications on Linux virtual machines using Nginx servers.

PROJECT EXPERIENCE

1. React E-Commerce Application (React.js, Redux, HTML5, CSS3, REST APIs)

- Developed a responsive E-Commerce application utilizing Redux for centralized state management.
- Built reusable React components to handle live cart adjustments, quantity updates, and fluid navigation.
- Implemented Add to Cart, quantity updates, and dynamic cart management with responsive product and cart pages.

2. Gaming UI Application (React.js, React Router, JavaScript, Custom CSS)

- Designed a high-fidelity gaming interface featuring component-based layouts and responsive navigation.
- Created reusable Navbar, Footer, Product Cards, and Page Sections using component-based architecture.
- Designed responsive product showcase pages with custom CSS, banners, logos, images, and structured content.

3. RBAC Dashboard Application (Angular, Node.js, Express.js, TypeScript, JWT)

- Engineered a Role-Based Access Control dashboard implementing dynamic role-specific authorization for Admin and General Users.
- Developed server-side RESTful APIs with advanced data validation, HTTP services, routing, and loading state management.
- Applied component-based architecture and responsive design, including testing, debugging, and troubleshooting.

4. Dockerized Application Deployment (Docker, VMware, FileZilla, Linux Administration)

- Containerized separate React and Java application modules using custom Dockerfiles, HTTP Server/Nginx, executable JAR files, and Docker CLI tools.
- Transferred applications from Windows to Linux environments using FileZilla (FTP) and managed the container deployment lifecycle.
- Performed deployment testing, troubleshooting, and configuration management, gaining hands-on experience in Linux administration and networking.

5. DevOps Capstone Project (Jenkins, Ansible, Git, Docker, Linux, CI/CD)

- Configured a fully automated end-to-end CI/CD pipeline using Jenkins, Git, Docker, Linux, and Ansible for automated application delivery.
- Setup master/develop branching workflows on GitHub, Jenkins pipelines, commit triggers, and automated Build/Test/Production stages.
- Implemented Docker containerization and Ansible configuration management across a Jenkins Master-Slave architecture on Linux servers.

INTERNSHIP EXPERIENCE

Deloitte | Data Analytics Job Simulation (Forage) | February 2025

- Completed Deloitte Australia Data Analytics Job Simulation on Forage, working on practical data analytics and forensic technology tasks.
- Used Microsoft Excel to clean, organize, classify, and analyze datasets to identify trends, patterns, and business insights.
- Created interactive Tableau dashboards to visualize analytical findings and develop data-driven business recommendations.

Shiro Software Solution | Machine Learning Intern | July 2023

- Built preprocessing data pipelines and evaluated foundational AI and Machine Learning concepts and workflows.
- Explored various AI tools and platforms to understand their functional capabilities and practical business applications.
- Practiced Prompt Engineering by creating and refining structured prompts to improve AI output quality, accuracy, and consistency.

NSIC Technical Services Centre | Cyber Security Intern | July 2023

- Analyzed structural infrastructure security flaws and implemented threat awareness practices for secure software development.
- Gained operational knowledge regarding system protection, information security, common cyber threats, and security awareness.
- Studied network security protocols, malware tracking, phishing indicators, and cyber attack prevention techniques.

EDUCATION

B.E. in Computer Science and Engineering
Amrita College of Engineering and Technology (2020 – 2024) | Aggregate: 79.3%

CERTIFICATIONS

- Linux Automation Deployment – Red Hat
- Data Analytics Simulation Certificate – Deloitte
- AWS DevOps–Intellipaat (2024–2025)
