Portfolio

PROFESSIONAL OBJECTIVE

Motivated IT professional with a strong foundation in networking, technical support, HTTP, REST APIs, JSON, and XML. Skilled in troubleshooting, analyzing API requests and responses, and understanding system integration workflows. Eager to contribute to an IT Support or API Integration team while continuously developing expertise in enterprise integration technologies.

TECHNICAL SKILLS

- Networking: OSI Model, TCP/IP, IPv4 Addressing, Subnetting, VLANs, Routers & Switches, DNS, DHCP, TTL, Network Troubleshooting
- IT Support: Hardware & Software Troubleshooting, Windows Support, System Configuration, Network Connectivity, Peripheral & Device Setup
- API & Integration: HTTP, REST APIs, API Requests & Responses, JSON, XML, API Testing
- Tools: Postman, Git, GitHub, Wireshark, Linux, Command Line

INTERNSHIP EXPERIENCE

Cyber Crime Intern

Puducherry Cyber Crime Police Station [06/2025 –07/ 2025]

- Registered and documented cybercrime complaints, ensuring accurate case intake and record-keeping
- Supported investigation of a social media-based hardware scam case involving fraudulent advertisements targeting shop owners for financial fraud
- Gained practical knowledge of cybercrime case lifecycle from complaint registration to investigation and resolution Cybersecurity Intern

Elevate Labs [12/ 2025 – 01 /2026]

- Gained hands-on experience with security tools including Wireshark, and Nmap for vulnerability scanning and network traffic analysis
- Developed a Web Vulnerability Finder tool to identify common security weaknesses in web applications [GitHub :https://github.com/dineshKumar5008/Web-Vulnerability-Scanner.git]

PROJECT & PUBLICATIONS

SHALX NETGUARD – Network Monitoring & IT Support Platform

Technologies: Python, FastAPI, React, TypeScript, Suricata

- Developed a network monitoring platform for network visibility, host health monitoring, and alert analysis.
- Implemented network discovery and topology visualization to support network troubleshooting.
- Integrated Suricata/EVE alerts into a centralized dashboard for monitoring and analysis.
- Built and deployed a FastAPI backend and React-based dashboard for network and system monitoring.

AI-Driven Cryptographically Auditable Cloud-Based E-Voting System

Research Paper | ICIMIA-2026 | IEEE Proceedings

- Co-authored a research paper proposing a secure and auditable cloud-based e-voting system.
- Worked with concepts including Multi-Factor Authentication (MFA), SHA-256 hash chaining, eligibility verification, and AI-based behavioural analytics.
- The proposed system combines authentication, vote integrity, eligibility validation, and behavioural monitoring into a multi-layered architecture.
- The paper was published in the Proceedings of the 5th International Conference on Innovative Mechanisms for Industry Applications (ICIMIA-2026).

A Novel Self-Destructive Ephemeral Cryptographic Key Generation Mechanism for SecureDigital Storage and Access

Patent Application No:202641022205 A | Published: March 2026 |Role: Co-Inventor

- Contributed to a proposed ephemeral cryptographic key management mechanism for secure digital data storage and access.
- Worked on the concept of dynamically generated keys with controlled lifecycles and automated key destruction.
- The proposed framework incorporates context-aware access control, session monitoring, auditing, and automated key destruction.

EDUCATION

Bachelor of Engineering

Mahendra Engineering college, Namakkal — 2023-2027(final year)

CERTIFICATIONS

- Cybersecurity Virtual Experience Program – Tata Group (Forage)
- Introduction to Cybersecurity and Ethical Hacking – Cisco Networking Academy
- Ethical Hacker-Udemy
