REJINA VINNARASI S

Aspiring AI and Data Science engineer with web development skills, strong creative and analytical abilities, seeking an opportunity to contribute to innovative projects while enhancing technical expertise and professional growth.

PROJECTS

TripForge – AI-Powered Journey Planner

Developed a smart AI-powered tour booking web application to simplify travel planning and package reservations. The system allows users to search, filter, and book tour packages efficiently with AI-driven recommendations and chatbot assistance.

FakeLens-ML: AI Image Detection System

Developed a Machine Learning-based system to identify AI-generated and real images using image feature analysis. Implemented Flask, React.js, and PostgreSQL to provide accurate classification with confidence and trust scores.

INTERNSHIPS

- **Generative AI Intern – FFUTUREWISE:** Applied LLM and Transformer concepts to develop AI-driven solutions for real-world applications.

- **Full Stack Developer Intern – Ideal Formatic Group of Companies:** Developed user-friendly full-stack web applications for real-world projects.
- **Web Developer Intern – Oneyes Infotech Solutions:** Designed responsive web pages and user interfaces using Figma for real-time projects.

CERTIFICATION

- Completed NPTEL in "Introduction to Internet of Things" with 58%.
- Certified Value Added Courses Machine Learning with AI Applications.

CO-CURRICULAR

- Participed in National Level Women's Hackaton "TechDivation", Panimalar Engineering College – Chennai.
- Led a team shortlisted for the intercollege SIH Hackathon.
