Professional Summary

Aspiring Software Engineer with strong knowledge of Java, SQL, and software development principles. Experienced through internships in data analysis and visualisation, with hands-on development of Java and full-stack applications. Passionate about building efficient software solutions, solving real-world problems, and continuously learning new technologies.

Technical Skills

Programming Languages: Java, Python (Basic), SQL (Basic)
Database: MongoDB (Basic)
Data Analytics & Visualization: Tableau, Power BI, MS Excel
Tools: GitHub, MS Word, VS Code
Core Skills: OOP, Software Development, Debugging, Problem Solving
Coding Platforms: HackerRank, LeetCode
Languages: English, Tamil | **Soft Skills:** Communication, Presentation

Experience

Data Science Intern
Mist Software Solution, Coimbatore
- Performed data analysis and predictive modelling using Python and SQL.
- Worked with structured datasets to identify patterns and generate meaningful insights.

AI & Data Science Intern
Cube AI Solutions Tech, Tiruchengode
- Developed an AI-powered Presentation Maker and worked with Java, MERN, and Tableau.
- Created interactive Tableau dashboards to visualize and communicate data insights.

Projects

Smart Civic Issue Reporting and Resolution System *MERN Stack*
- Developed a full-stack platform for reporting and tracking civic issues with authentication, image uploads, location-based reporting, and status tracking.
- Designed a structured workflow to improve issue reporting, monitoring, and resolution.

AI Presentation Maker *Python, MERN Stack, AI*
- Developed an AI-powered web application that generates presentation slides from user input.
- Integrated AI functionality with a web interface to provide a simple presentation-generation workflow.

Li-Fi-Based Data Communication System *IoT, Arduino, Li-Fi*
- Implemented wireless data transmission using LED-based visible light communication.
- Used Arduino to demonstrate Li-Fi based communication between transmitter and receiver.

Electric Vehicle Data Intelligence Dashboard *Tableau, Data Analytics*
- Developed an interactive Tableau dashboard to analyze electric vehicle registrations, battery range, and vehicle trends.
- Visualized trends by model year, state, manufacturer, and vehicle model, including CAFV eligibility analysis.
- Created interactive charts, maps, and filters to present meaningful insights from EV data.

Education

Nandha Engineering College, Erode 2023–2027
Bachelor of Technology in Artificial Intelligence and Data Science *CGPA: 8.3/10*

Certifications & Achievements

- Python Workshop – IIT Madras (Dec 2023)
- Java Programming Certificate – Coursera
- 2nd Place – 24-Hour Hackathon
- NPTEL – Cloud Computing
