ACHIEVEMENTS

100% Attendance
Full attendance throughout the academic year.

Wipro Milestone
Python assessment, First Grade.

PROJECTS

Weather Prediction
Artificial Intelligence & Machine Learning
- Built a machine learning-based weather prediction system, covering data preprocessing, model training, and model evaluation.
- Analyzed weather-related data to identify patterns supporting data-driven forecasting decisions.
- Evaluated model performance to improve prediction reliability over a two-month project cycle.
- Technologies Used: Python, Pandas, Scikit-learn, Jupyter Notebook.

Universal Life Assistant
AI / Full Stack Development
- Designed and developed a full-stack AI-based life-assistant application aimed at simplifying everyday user tasks through intelligent, user-focused features.
- Combined AI-driven assistance with a functional application interface to address practical, real-world problems.
- Applied full-stack development concepts to build an end-to-end working application within a one-month timeline.
- Technologies Used: Python, HTML, CSS, JavaScript.

ABOUT ME

I am having an 1.7 years of experience in data validation of AI Operation role. Specifically the work as an AI Evaluator also a Data Specialist doing fact-checking, verification, and grounding for an AI shopping assistant like as similar e-commerce generative AI. Looking for an opportunity to contribute to customer satisfaction and service excellence in a banking/customer service role.

EDUCATION

- **Anna University Muthayammal college of Engineering | 2019-2023**
  Bachelor of Engineering in Agriculture Engineering. Cumulative|CGPA- 8.2%
- **Bharathidasan University Centre for Distance and Online Education Tiruchirappalli | 2024-2026**
  M.B.A Business Administration Human Resources | Cumulative/CGPA - 7.2%

WORK EXPERIENCE

Mahendhara Next Wealth It India Pvt Ltd | July 2024 - Feb 2026
[Execute Operation | AI Quality Operations Executive]

- 1.7 years of experience to work in a specialized data validation , AI Evaluator doing as fact checking, verification, and grounding for an AI shopping assistant like similar e-commerce generative AI.
- Evaluated and verified generative AI outputs to ensure accurate Retrieval-Augmented Generation (RAG), confirming that product details aligned perfectly with primary sources and manufacture data Reinforcement Learning from Human Feedback (RLHF).
- Conducted rigorous fact checking on AI generated product recommendations to eliminate hallucinations and ensure absolute data integrity as per customer satisfaction.
- My role is Data Annotator, Promoted to as Quality Check, Quality Analysis and Subject Matter Expert (SME) within a short tenure based on high accuracy .
- Contributed to improve performance by delivering accurate resolutions and sharing quality feedback.

Key Achievements

- Project of the month (2+ times in 1.7 years)
- Developed and executed multiple Proofs of concept (POCs), SOPs and process documentation
- worked as MAC project to edit the video to compress in the tool
- Q3 and Q4Top Performer of the Project good worked .
- Software Testing Full Stack completed in "Q spiders" in Rajajinagar, Bangalore.
- Internship training during the 3rd year of B.E Agriculture at Rasi Agriculture and Construction EquipmentsPrivate Ltd. (13 days).
- Testing Project - Shopper Stack : It's Online Shopping portal ecommerce website . (https://www.shoppersstack.com)
- Q-bank Project : It's an Online Banking Application website. (http://106.51.87.42:9001/)

SKILLS

- Teamwork
- Time Management
- Leadership
- Effective Communication
- Critical Thinking
- AI & Data Evaluation
- Tools & Technologies & Soft Skills

JOB TITLE

- Generative AI Quality Evaluator (E-commerce)
- AI Data Verification & Grounding Specialist
- Large Language Model (LLM) Content Validator
- AI Output Intergrity Specialist
