PROFILE SUMMARY

Full-stack developer experienced in building scalable web applications with React, Node.js, MongoDB, and REST APIs. Interested in developing production-ready systems and applying AI/ML to real-world solutions. A continuous learner focused on improving technical skills through hands-on development and practice.

PROJECTS

KAAPAAN-TRAFFIC VIOLATION INDICATOR

Developed KAAPAAN, an AI-powered traffic violation detection system using MERN, YOLOv8, and OpenCV to detect violations such as no helmet, mobile usage, triple riding, stunt riding, smoking, and fire incidents. Built a real-time, low-latency pipeline using WebSockets and REST APIs to generate automated alerts with image and video evidence, enabling faster and data-driven traffic enforcement.

SRI-AI and ML enabled video analysis and interpretation(SIH-2025)

Developed an AI/ML-enabled video analysis and interpretation system for real-time suspect tracking, weapon detection, and suspicious behavior analysis, leveraging instance-level video summarization, pattern matching, and visual analytics to reduce large video feed processing time from 100% (1-hour footage) to ~33% (~20 minutes), built on an agentic microservices architecture integrating 7+ AI/DL modules for scalable, low-latency intelligence

Shree – AI Agent for Temple & Pilgrimage Crowd Management

Developed an AI-powered temple and pilgrimage management platform integrating computer vision, predictive crowd analytics, smart kiosks, and intelligent parking management to monitor crowd density, optimize pilgrim flow, provide real-time guidance, automate visitor assistance, and enhance safety and operational efficiency through AI-driven decision support..

Similar Question Finder with Auto-Tagging

Developed an AI-powered EdTech platform using Sentence Transformers (all-MiniLM-L6-v2) and cosine similarity for semantic question matching.Implemented automatic subject tagging and question history using React, FastAPI, and MongoDB..

WORK EXPERIENCES

App Developer-Application Development Hub,CSE Dept.,Nandha Engineering College

Full Stack Developer (Intern) - Mahat Labs Pvt Ltd

Developed full-stack application prototypes and automated basic business workflows during a fast-paced 28-day internship, gaining hands-on experience in rapid application development.

EDUCATION

Nandha Engineering College — **Nov 2023 - Present**
Bachelor of Engineering in Computer Science and Engineering - CGPA : 8.6 — Erode, Tamilnadu

TECHNICAL SKILLS & TOOLS

- **Languages:** Java, Python
- **MERN:** React,Node.js,Express js,**REST API**
- Tensorflow, Pytorch,AIML,Deep Learning
- **Databases:** PostgresSQL, MongoDB,cloudinary
- **Tools & Platforms:** Git, GitHub, Render, Vercel, VS Code, Google Colab, Figma, Canva,
- **Devops-**CI/CD pipeline.

ACHIEVEMENTS

- **Grand Finalist - Smart India Hackathon 2025,** *Oriental University, Indore, Madhya Pradesh.*
- **Patent Filed: "Edge-Based Unified AI Agent for Autonomous Surveillance Behavior Analysis and Risk- Driven Response"**, focused on real-time edge-level AI surveillance and automated risk-aware responses.
- Successfully completed 24-hour Hackathons at Nandha Engineering College and SSN College,chennai.
