PROFESSIONAL SUMMARY

Motivated and enthusiastic fresher pursuing B.Tech in Artificial Intelligence and Data Science, with a strong foundation in programming, databases, data analytics, and emerging technologies. Gained practical exposure through internships and academic projects involving software development, data analysis, and AI-based applications. Eager to apply technical knowledge, learn new technologies, and contribute to real-world projects in a professional environment.

CORE SKILLS

Programming Languages: Python, SQL, Java (Core)
Database Management: SQL, MySQL, Query Writing
Data Analysis & BI Tools: Data Analysis, Data Wrangling, Data Visualization, Power BI, Microsoft Excel, ETL
Web Technologies: HTML, CSS
Machine Learning Fundamentals: Data Preprocessing, Model Building, Model Evaluation

INTERNSHIP EXPERIENCE

Data Analyst Intern — *Ideal Formatic Groups of Companies* 20 Days
- Supported data cleaning, validation, and reporting activities while gaining hands-on experience in SQL, Microsoft Excel, Power BI, ETL concepts, and data modeling.

Web Development Intern — *One Yes Infotech* 1 Month
- Designed and developed user interface prototypes using Figma, focusing on creating structured layouts, interactive screens, and user-friendly design flows based on project requirements.

Generative AI Intern — *Ffuturewise Software Solutions* 20 Days
- Developed and maintained Generative AI applications with hands-on exposure to large language models and prompt engineering workflows, applying structured problem-solving to optimize model output accuracy.

PROJECTS

Trip Forage — AI-Powered Journey Planner **Python, Machine Learning**
- Engineered a smart travel-booking web application integrating an AI chatbot and a personalized recommendation engine, with secure payment processing via Google Pay API integration.

Fake Lens — AI Fake Image Identifier **Python, ML Algorithms, XceptionNet, RetinaFace, OpenCV, Streamlit**
- Built a machine learning classification model using OpenCV for image preprocessing to distinguish AI-generated images from real ones, delivering a confidence/trust score with transparent, explainable predictions via a Streamlit interface.

AI-Powered Multimedia Deepfake Detection & Forensic Analysis Platform **React, Flask, Redis, Celery, PostgreSQL**
- Designed and developed an AI-powered multimedia deepfake detection platform that analyzes image, audio, and video content using deep learning models and generates forensic reports with explainable AI insights, built using React, Flask, Redis, Celery, and PostgreSQL for scalable and efficient processing.

EDUCATION

B.Tech – Artificial Intelligence & Data Science 2023 – 2027
Kongunadu College of Engineering & Technology CGPA: 8.3

HSC 2022 – 2023
S.U.M Higher Secondary School 78%

CERTIFICATIONS & LANGUAGES

- Internet of Things (IoT) — NPTEL
- Cloud Computing — NPTEL
- Tamil — Native/Fluent
- English — Proficient

ACHIEVEMENTS & HACKATHONS

- 1st Prize, Paper Presentation — Indra Ganeshan College
- Paper Presentations: Anna Poorna College of Engineering, Muthayammal Engineering College, Kongu Engineering College
- Hackathons: Smart India Hackathon (SIH), CMR HACKFEST 3.0, EY Techathon, TECHDIVATHON
