## SUMMARY

Motivated and enthusiastic Electronics and Communication Engineering student seeking an entry-level opportunity. Eager to apply my technical knowledge and problem-solving skills in a professional environment.
Passionate about learning new technologies and contributing to innovative projects. Committed to continuous growth while adding value to the organization's success

## EDUCATION

| YEAR OF STUDY | STUDYING COURSE | EDUCATIONALINSTITUTE NAME | MARKS |
|---|---|---|---|
| 2027 | Bachelor Of Engineering | Kongunadu College Of Engineering and Technology | 7.59CGPA |
| 2023 | Higher Secondary School Education | The Modern Academy | 87% |
| 2021 | Secondary School Education | The Modern Academy | 100% |

## TECHNICAL SKILLS

- **Programming Languages:** Java, Python
- **Database Management:** MySQL
- **Web Technologies:** HTML, CSS, JavaScript
- **TOOLS**: GitHub , VS Code , LinkedIn
- **CORE TECHNOLOGY**: Embedded System , PCB ,VLSI, Digital Electronics, Analog Electronics

## SOFT SKILLS

- Willingness to learn
- Communication Skill
- Adaptability
- Time Management
- Positive attitude
- Problem Solving
- Decision Making

## PROJECTS

1. **SILENT ALERT SYSTEM USING DJANGO BASED SOCKET PROGRAMMING**

- Developed a real-time silent alert communication system enabling instant message transmission between connected devices.
- Implemented socket-based communication for fast data exchange and real-time notification handling.
- Created a web-based alert management system for efficient network communication and monitoring.

**Technologies Used:** Python, Django, Socket Programming, Web Socket, HTML, CSS, JavaScript, SQLite

**2 .PERFORMANCE ANALYSIS OF SISO ,SIMO AND MIMO WIRELESS COMMUNICATION SYSTEM UNDER REYLEIGHT FADING CHANNEL**

- Analyzed and compared SISO, SIMO, and MIMO system performance under Rayleight fading channel conditions.
- Evaluated wireless communication efficiency using parameters such as BER and SNR through simulation analysis.
- Demonstrated the impact of antenna diversity techniques in improving reliability and reducing fading effects.

**Technologies Used:** MATLAB, Wireless Communication, Digital Signal Processing, MIMO Systems, Rayleigh Fading Channel,

## INTERNSHIP

**EMBEDDED USING C**

- Gained hands-on experience in **Embedded C programming** for developing microcontroller-based applications.
- Learned **microcontroller architecture, GPIO interfacing, timers, interrupts, and serial communication (UART)** concepts.
- Developed and tested embedded programs for **hardware-software interaction and real-time applications**.
- Practiced **debugging, code optimization, and firmware development** using embedded development tools.

## CERTIFICATION

- **Java Programming –** Value Added Course - Kongunadu College of Engineering and Technology.
- **PCB Design –** Value Added Course -Kongunadu College of Engineering and Technology.

## CO CURICULAR ACTIVITIES

- **PAPER PRESENTATIONS:** Robotics **,** Voice Navigation Through Robotic Cars **,**Home Intrusion Detection System**,** Automated School Bus Safety System with Driver Health Monitoring **.**

- **WORKSHOPS:** 3D Printing Model , Math Festa **,** AI-Cyber Security
