Face to face

RISHANTH T

+91 7695817393 | rishanth0007@gmail.com

PROFESSIONAL SUMMARY

B.Tech Artificial Intelligence & Data Science graduate with project experience in AI applications, machine learning, deep learning, and LLM-powered systems. Familiar with Python, Java, SQL, RAG, vector databases, FastAPI, and integrating frontend, backend, and AI components.

EDUCATION

2022–2026 | B.Tech, Artificial Intelligence & Data Science | Sona College of Technology | GPA: 7.08/10

2020–2022 | HSC | AKV Matriculation Higher Secondary School | 75.5%

2018–2020 | SSLC | Sri Vidhyaa Mandir Higher Secondary School | 60.6%

TECHNICAL SKILLS

Programming & Database: Python, Java, SQL, DBMS

AI & Backend: Machine Learning, Deep Learning, RAG, LLMs, FastAPI

Frontend & Tools: React, TypeScript, Chroma, Ollama, Gemma, Celery, Redis, Git

Other Technologies: Streamlit, Firebase, OpenCV, Flask, BeautifulSoup, LanceDB

Core Skills: SDLC, Problem Solving, Communication, Teamwork, Time Management

PROJECTS

Codebase Onboarding & Internal Developer Assistant

- Built an AI assistant that answers natural-language questions about an uploaded codebase to help developers understand unfamiliar repositories.
- Used Retrieval-Augmented Generation (RAG) with Chroma to retrieve relevant code chunks; a bounded AI agent can use grep_repo, read_file, and git_blame tools to gather evidence.
- Added security checks including repository isolation, secret scanning, path validation, and tool-output sanitization.

Tech Stack: *React, TypeScript, Python, FastAPI, RAG, Chroma, Ollama, Gemma, Celery, Redis*

Phishing Detector

- Built a hybrid phishing-detection system combining URL structure, SSL/TLS certificate validation, and webpage content analysis.
- Used XGBoost classifiers and PyTorch MLP fusion; SHAP supports explainable risk assessments.

Tech Stack: *Python, XGBoost, PyTorch, SHAP, Streamlit, Firebase, HTML*

Cancer Cell Net

- Developed a deep-learning application to classify microscopic blood-cell images into malignant and benign cases.
- Included automated diagnostic report generation.

Tech Stack: *Python, OpenCV, Flask*

LearnEase

- Created an AI tutoring platform for document Q&A, summarization, web scraping, and multilingual voice support.
- Integrated Gemini AI, learning-history tracking, image generation, and user authentication.

Tech Stack: *Python, Gemini AI, Streamlit, Firebase, BeautifulSoup, LanceDB*

CERTIFICATIONS

Introduction to Internet of Things – NPTEL (2024) • Python for Data Science – Coursera (2024) • Java Fundamentals – Infosys Springboard (2024) • Solving Business Problems using SAP's Generative AI Hub (2025)

CO-CURRICULAR ACTIVITIES

Presented a paper at Knowledge Institute of Technology (VERVE 2024). • Participated in a public-speaking competition through Sona Speakers Forum. • Organized scientific learning workshops and events through Sona Science Club.
